---

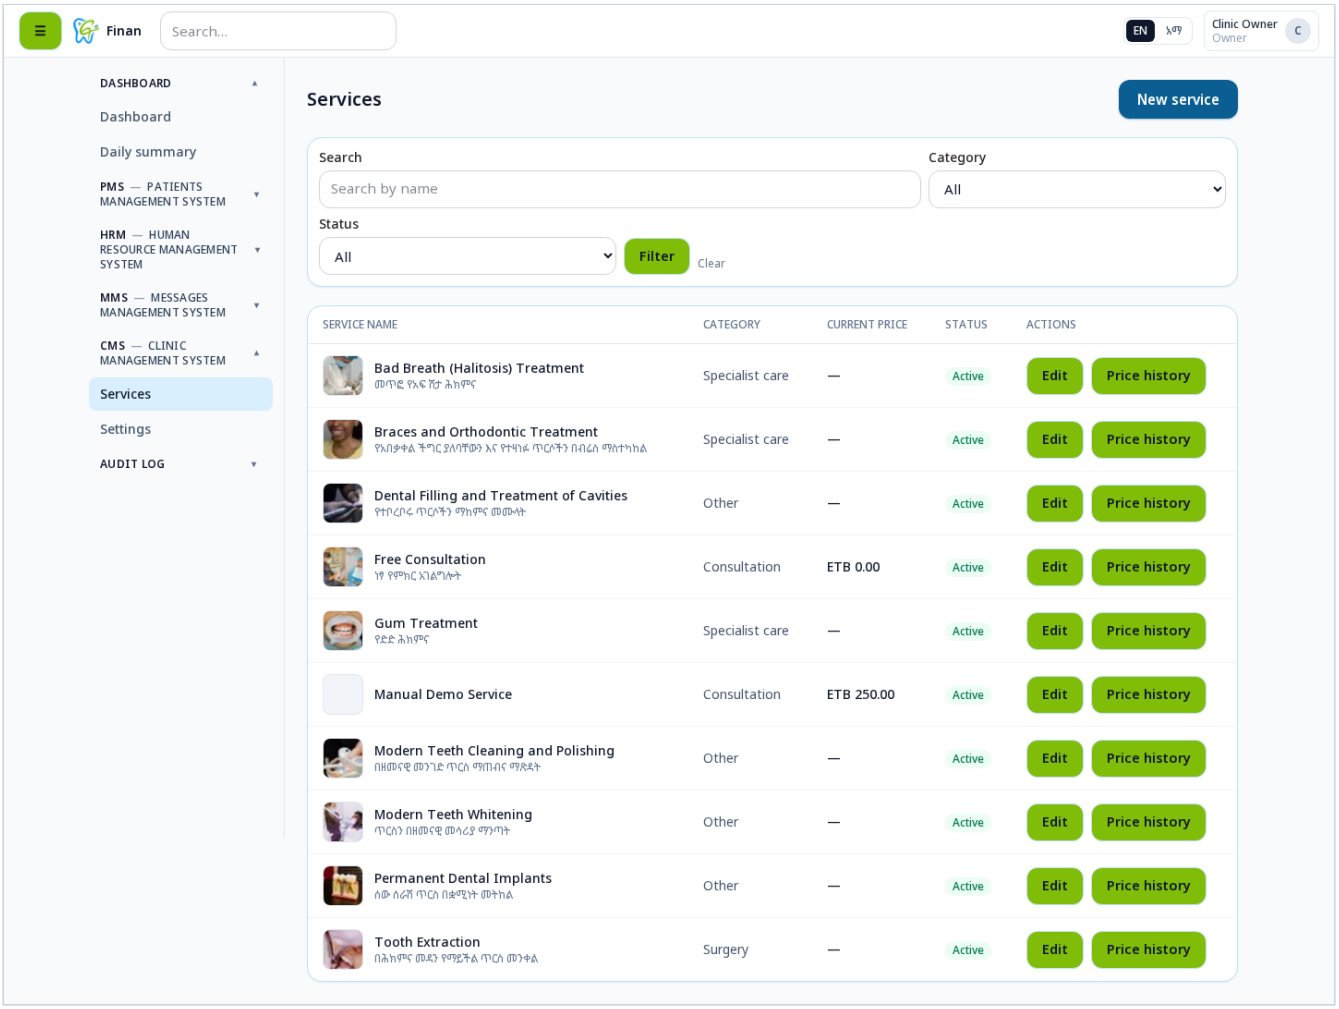

1. Introduction

The Clinic Management System (CMS) handles service catalog management, pricing, and clinic configuration settings for Finan Speciality Dental Clinic.

---

2. Service Management

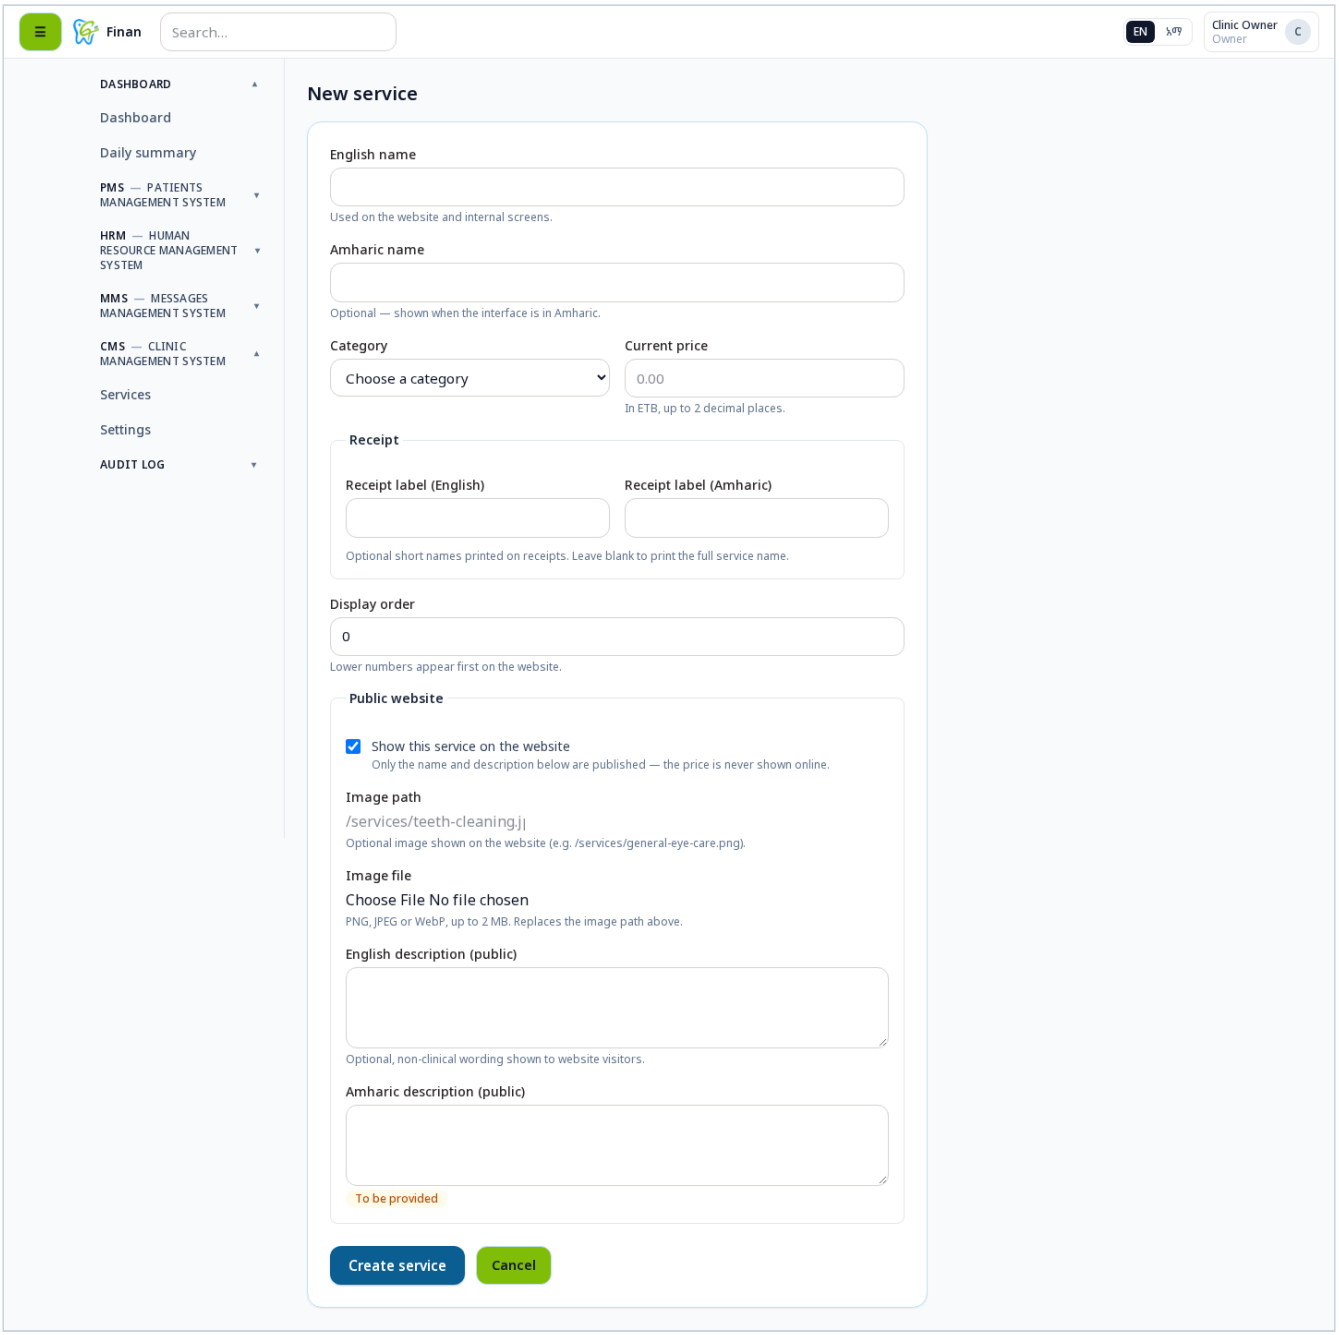

2.1 Services List

The Services List displays all dental services offered by the clinic, including: - Service name - Category - Price (ETB) - Duration - Status (Active/Inactive)

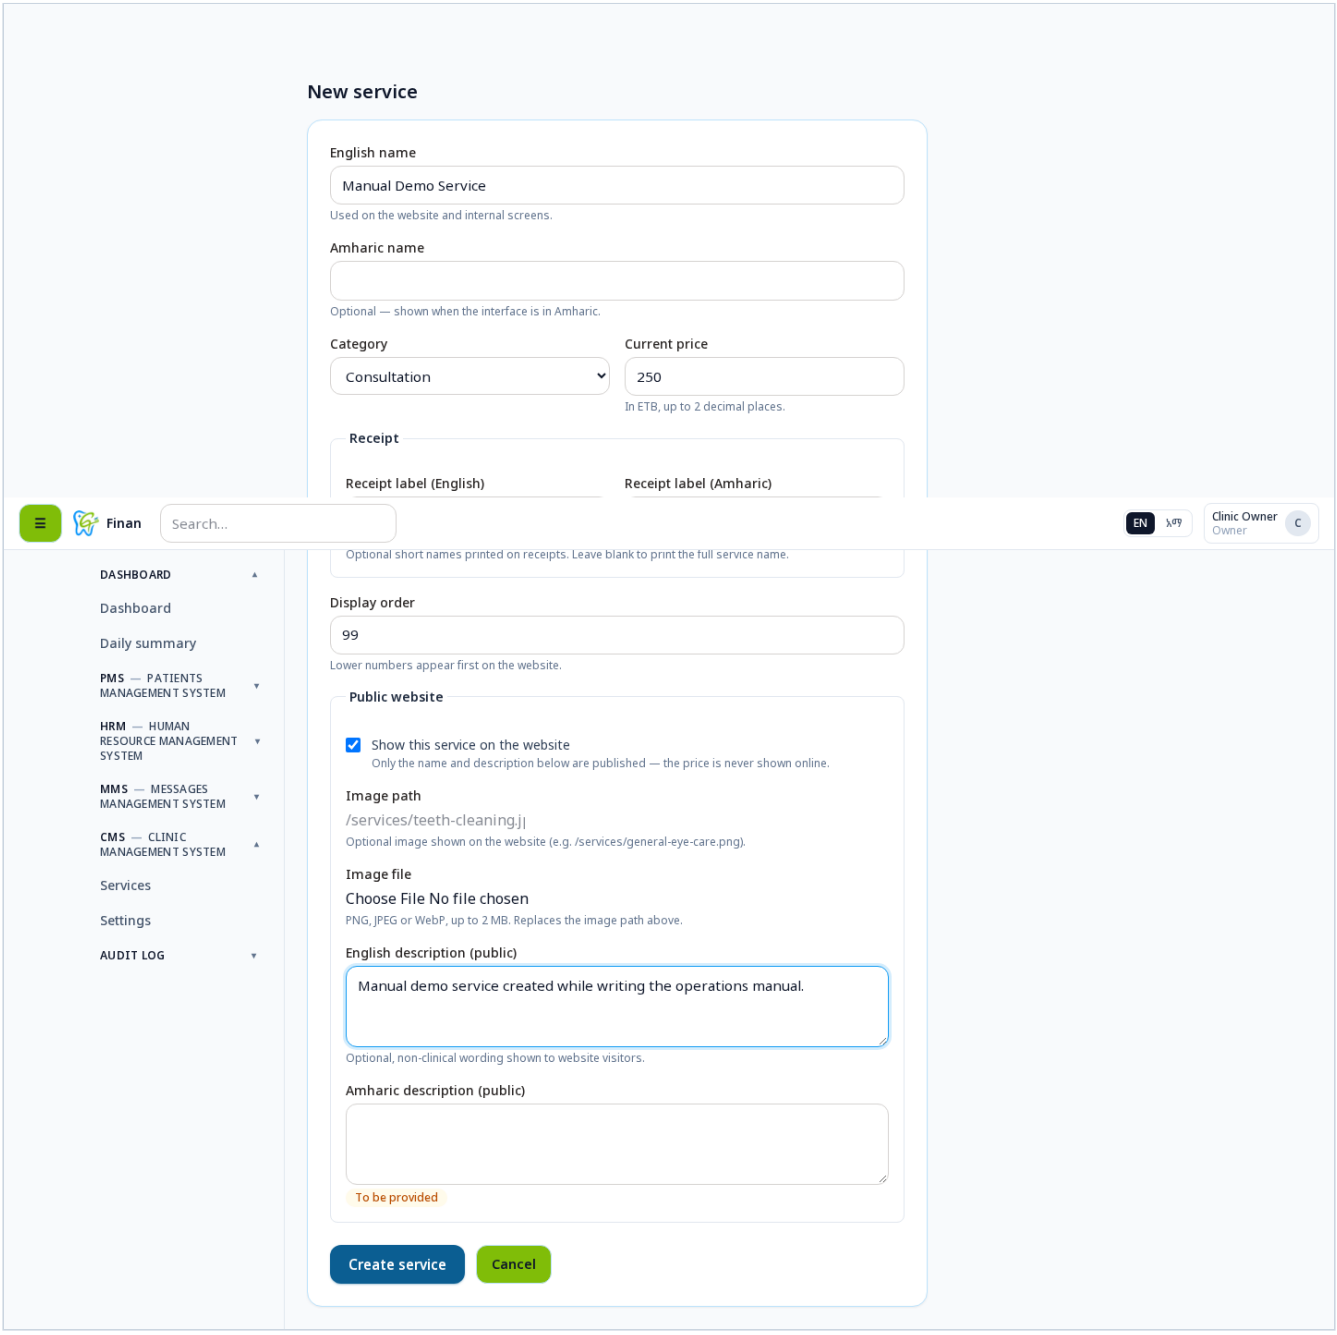

2.2 Adding a New Service

Empty Service Form

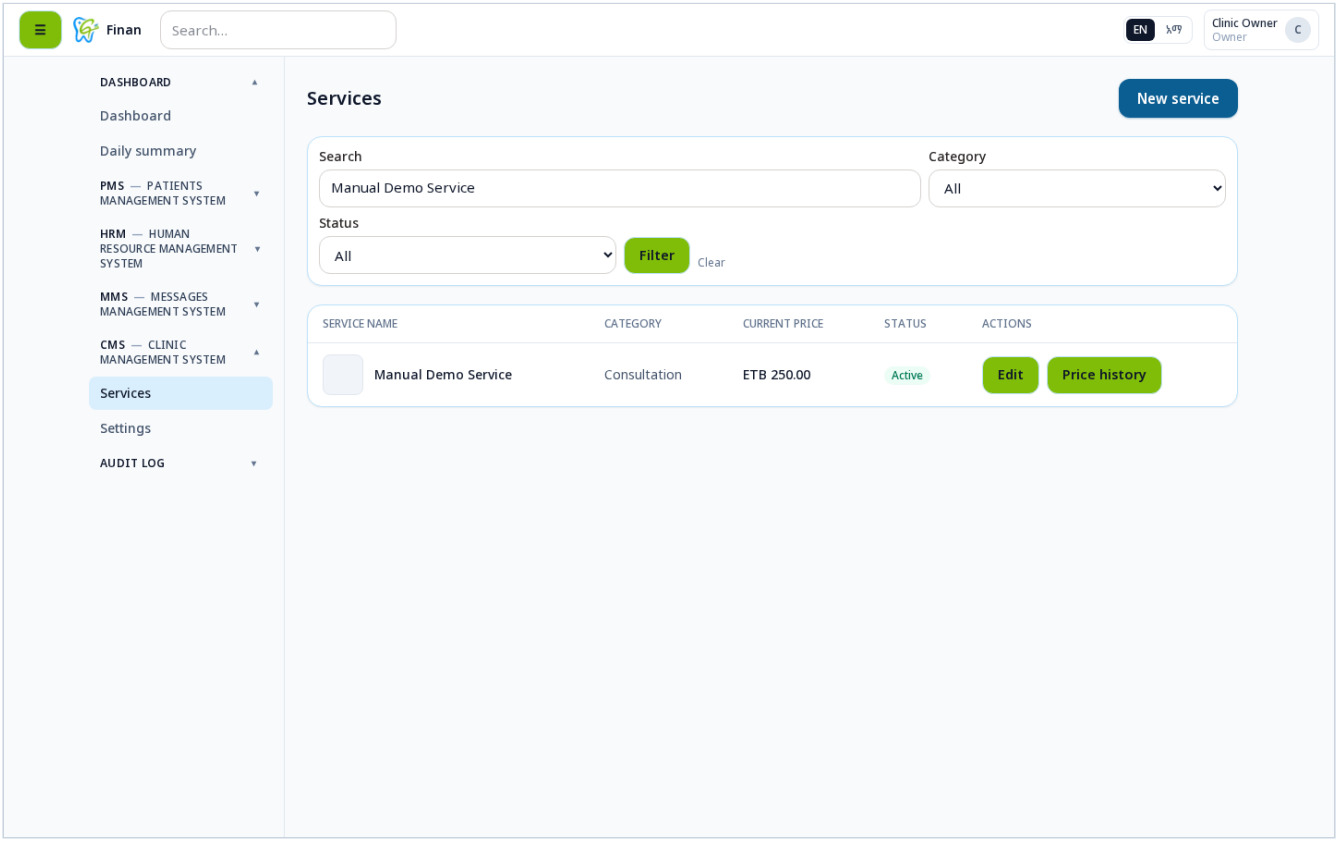

To add a new service: 1. Navigate to Services → Add New Service 2. Fill in the service details

Filled Service Form

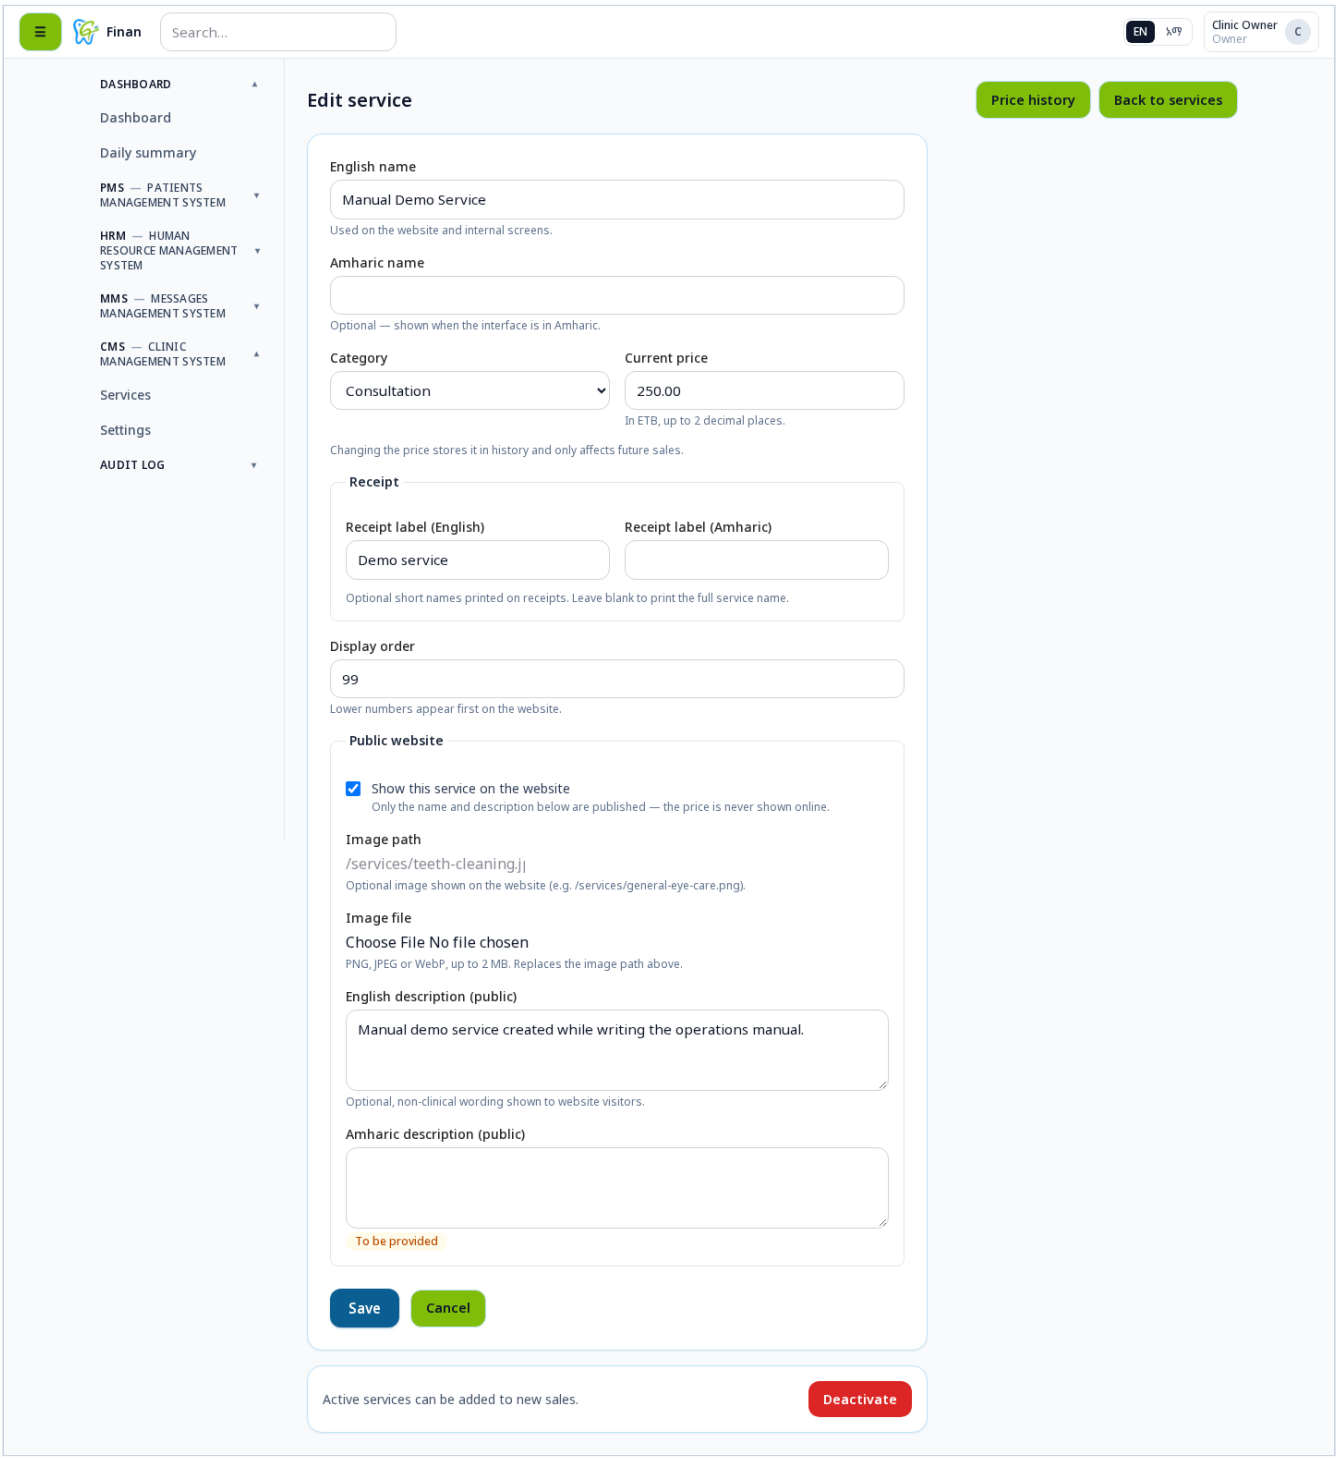

Required Fields: - **Service Name** - Name of the dental service - **Category** - Service category (General, Specialist, Preventive, etc.) - **Price** - Service price in Ethiopian Birr (ETB) - **Duration** - Service duration in minutes - **Description** - Service description (English/Amharic) - **Active** - Toggle to make service available

2.3 Service Created

Confirmation message after successfully creating a new service.

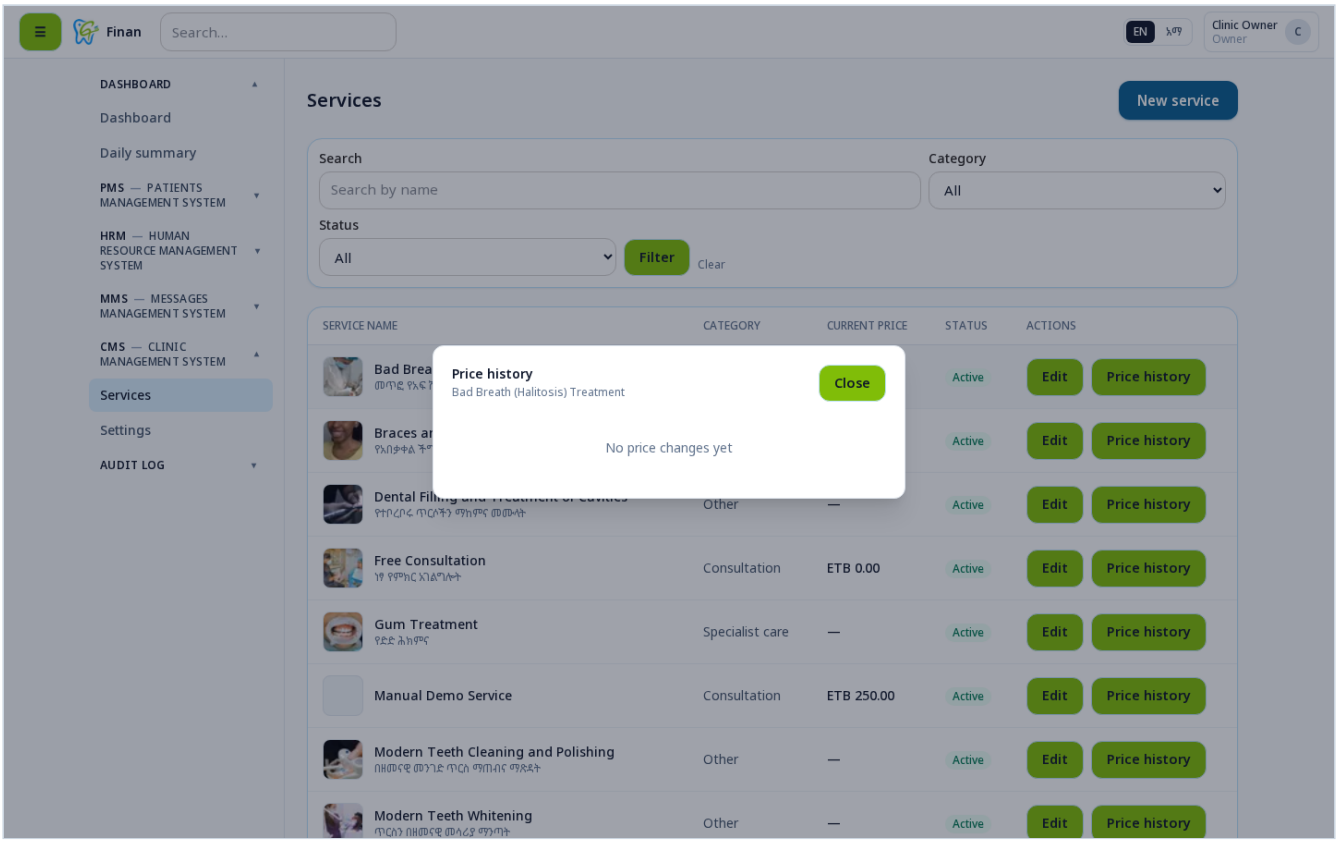

2.4 Editing a Service

To edit an existing service: 1. Click "Edit" on the service from the services list 2. Update the required fields 3. Click "Save" to apply changes

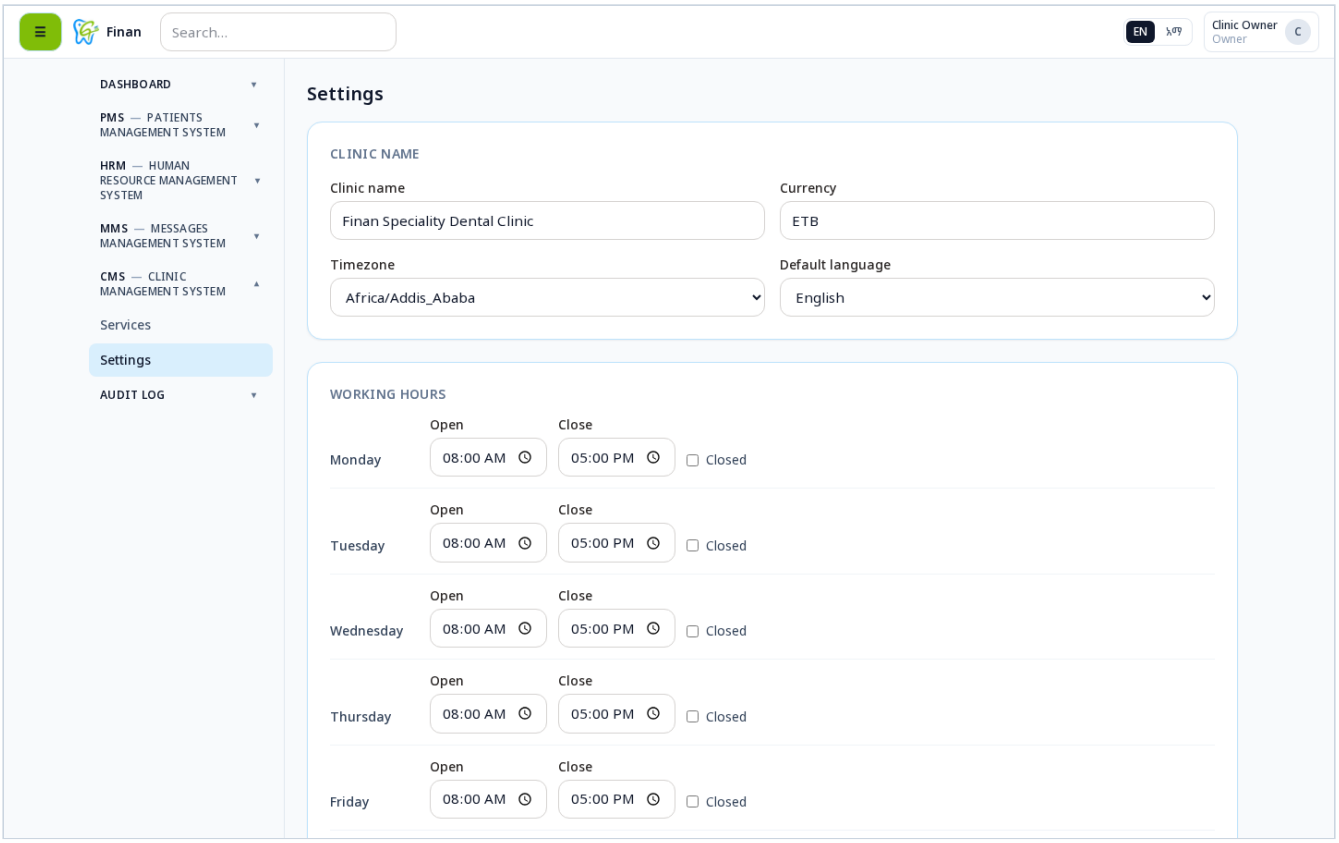

---

3. Price History

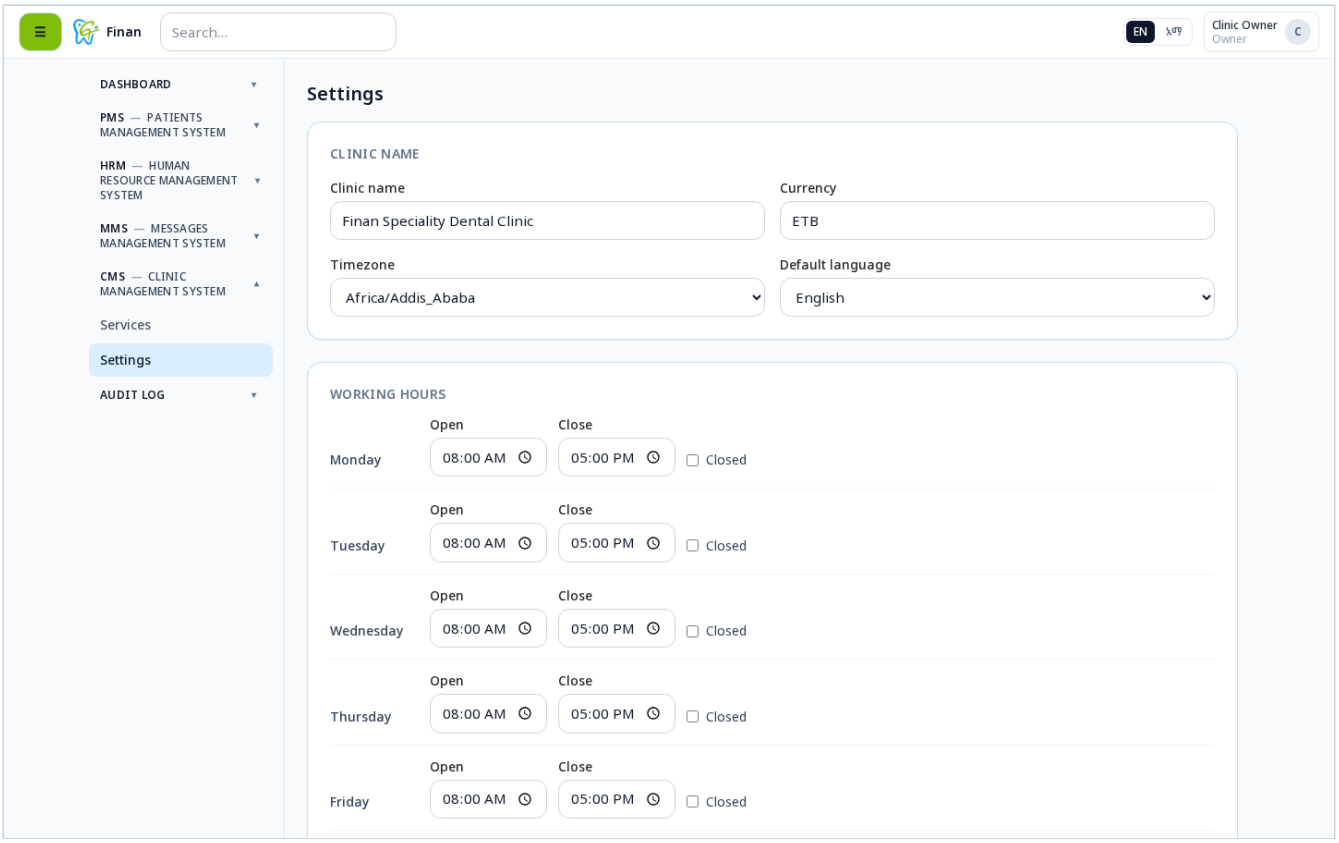

The Price History feature tracks all price changes for services over time, providing an audit trail of pricing modifications.

4. Clinic Settings

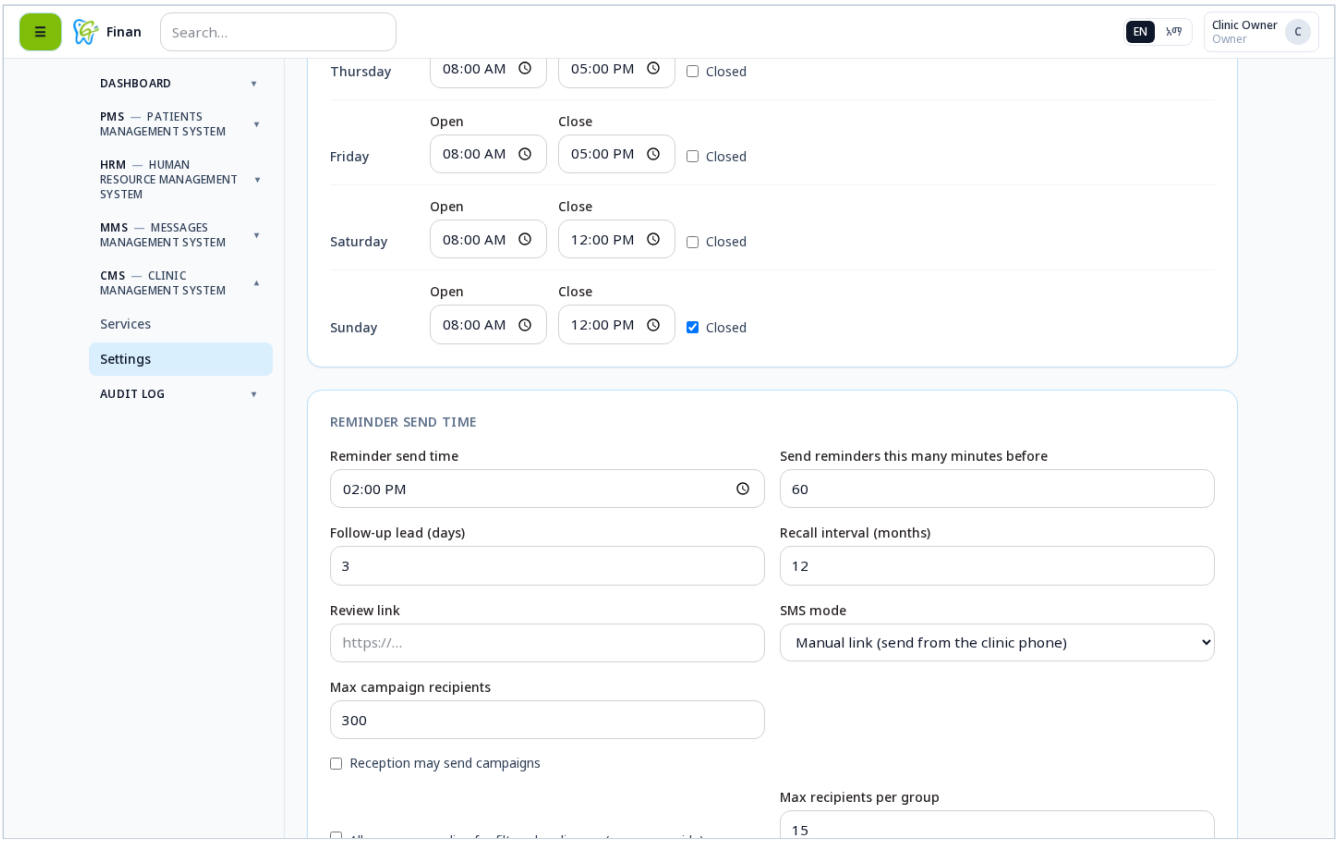

Configure basic clinic information: - Clinic name - Contact details - Address - Logo - Other general settings

5. Working Hours

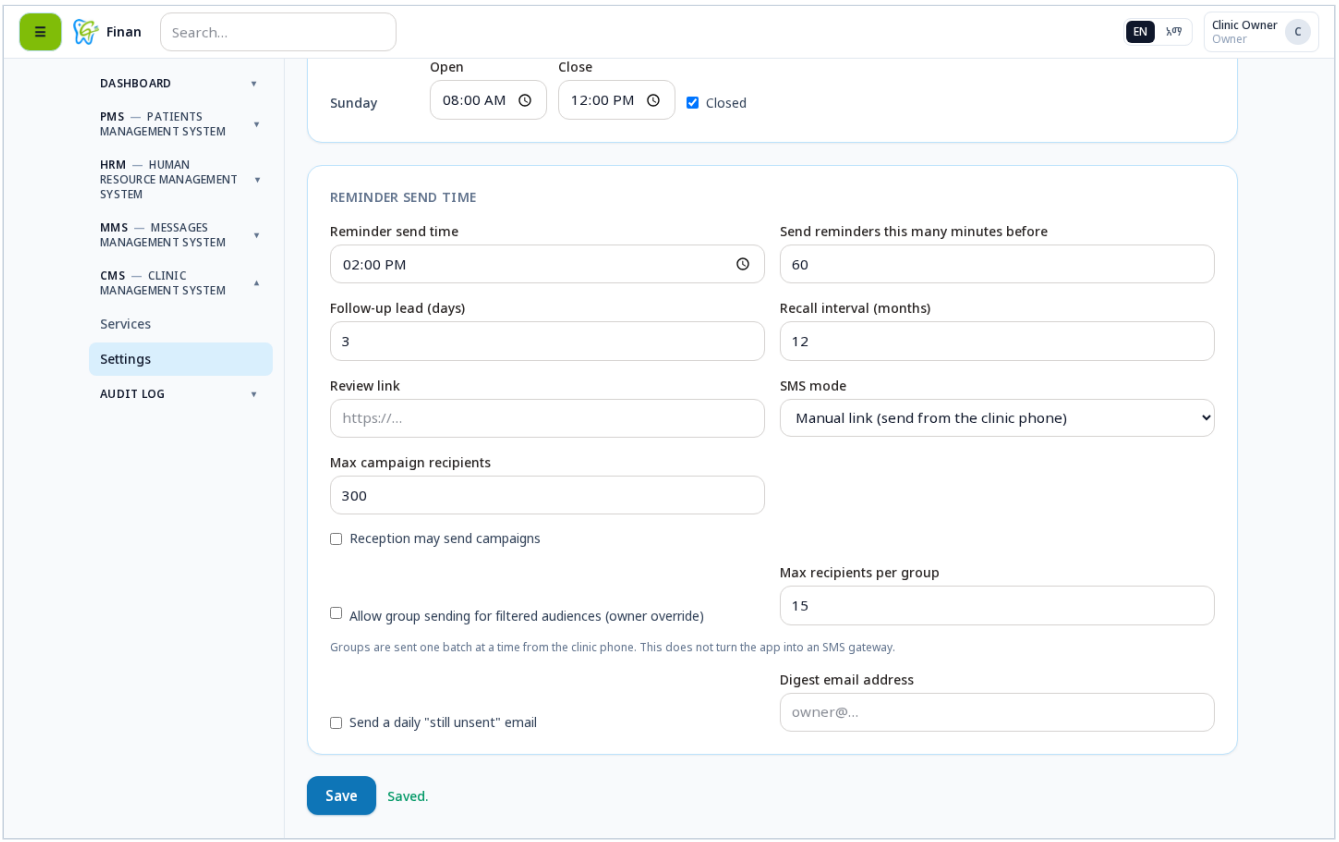

Set the clinic's operating hours: - Configure working days - Set opening and closing times for each day - Mark holidays/non-working days - Define appointment availability

6. Messaging Settings

Configure SMS/messaging settings: - SMS provider configuration - Message templates settings - Notification preferences - Campaign settings

6.1 Settings Saved

Confirmation message after successfully saving clinic settings.

For Support: Contact the system administrator for assistance with the CMS module.
