1. Introduction

The Patient Management System (PMS) is the core module for managing patient records, tracking sales, monitoring revenue, and handling follow-up activities at Finan Speciality Dental Clinic.

---

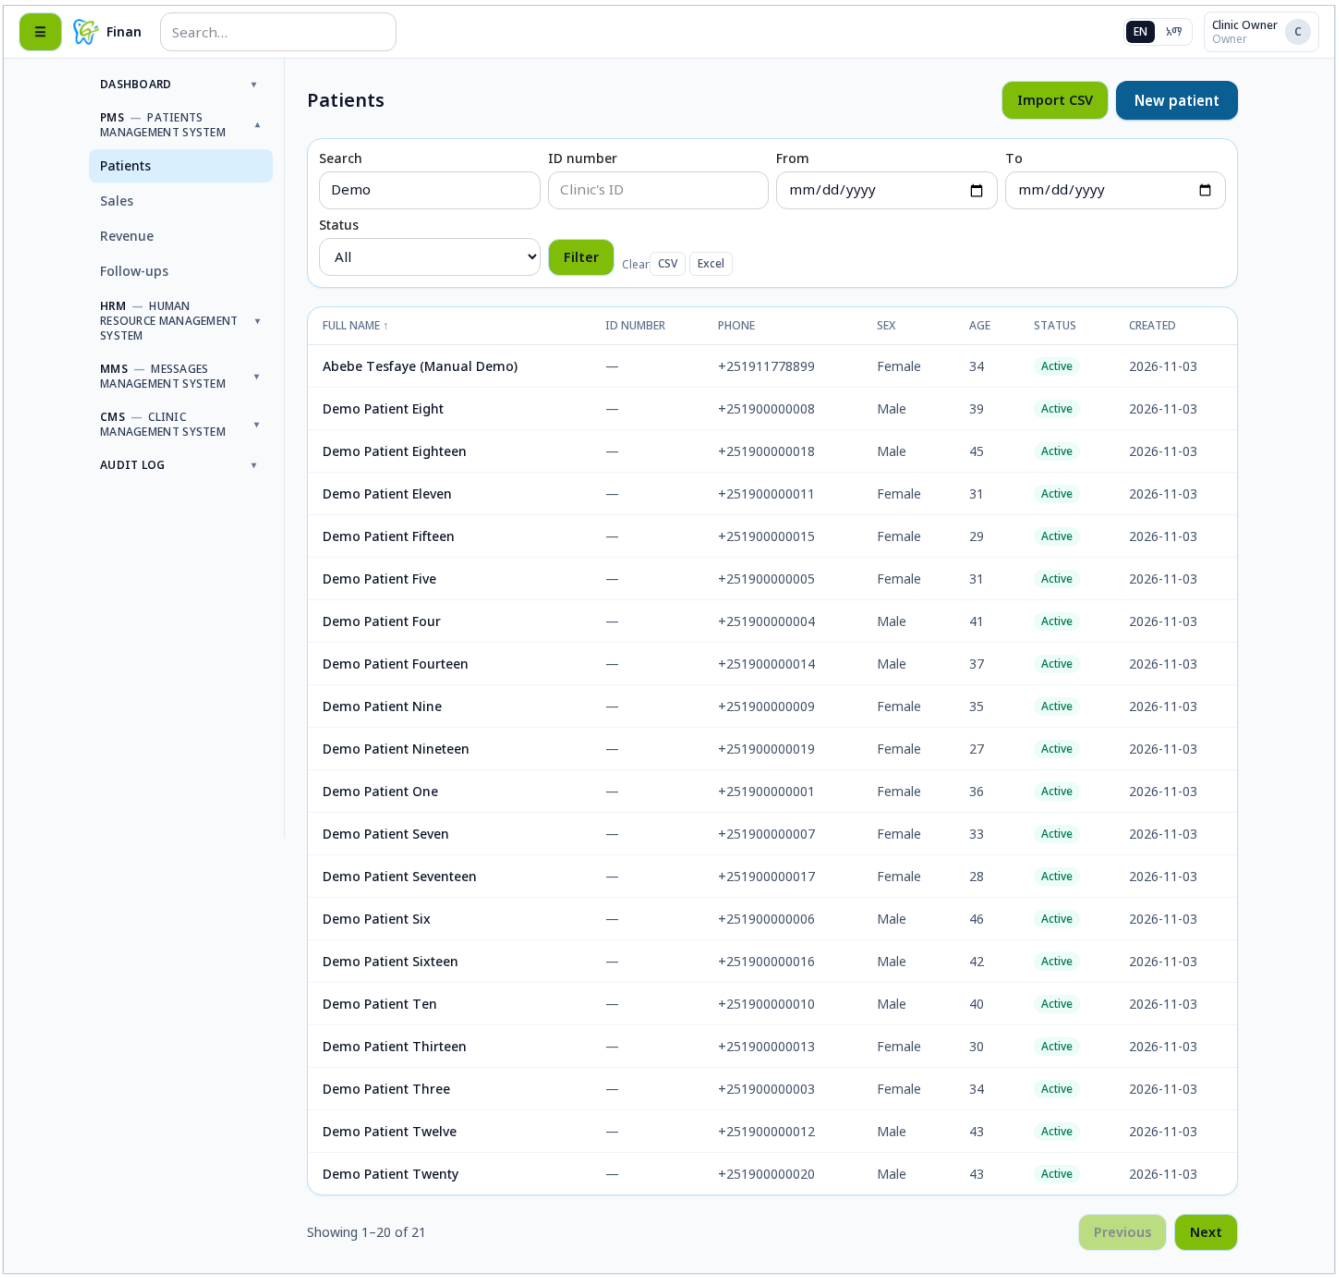

2. Patient List

The Patient List provides a complete overview of all registered patients.

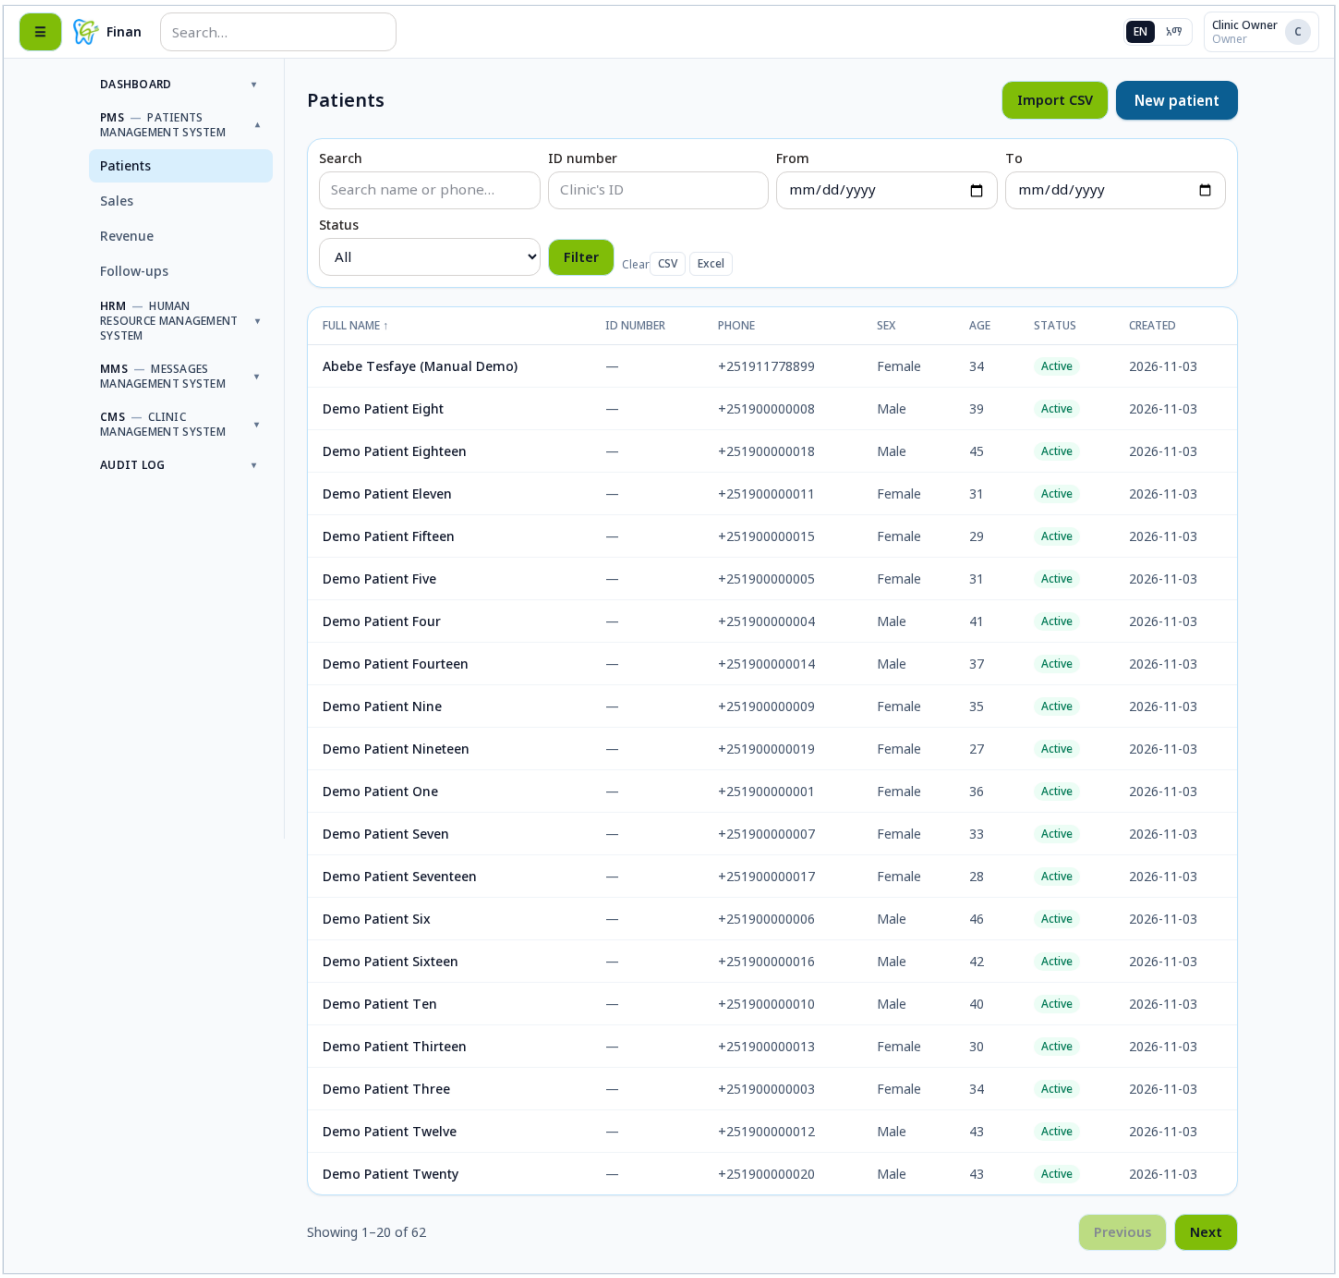

Key Features: - View all patients with their details (Name, Age, Phone, Address) - Quick access to patient actions (View, Edit) - Search and filter functionality - "New Patient" button to add patients

2.1 Searching Patients

Use the search bar to find patients by name, phone number, or other details.

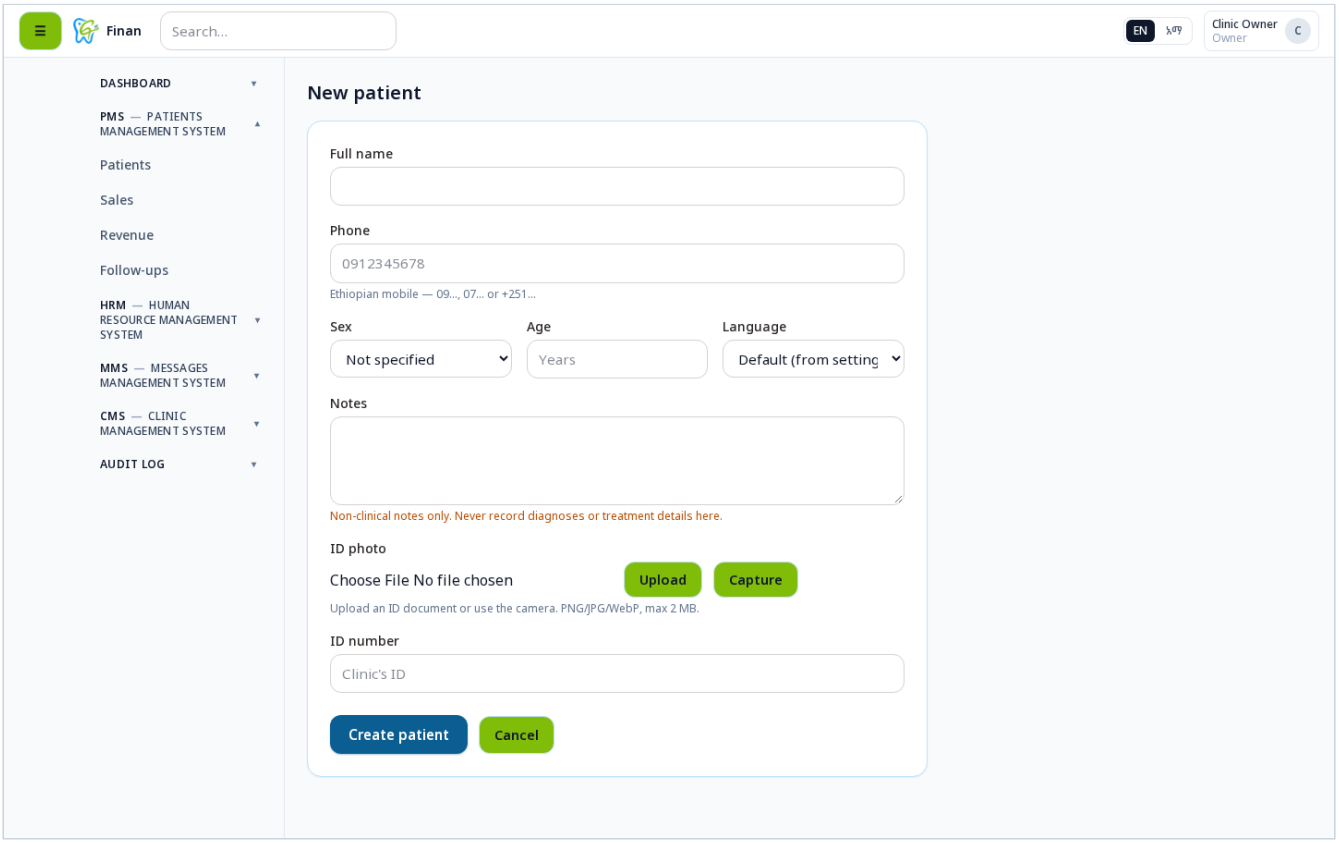

2.2 Filtering Patients

Apply filters to narrow down the patient list based on specific criteria.

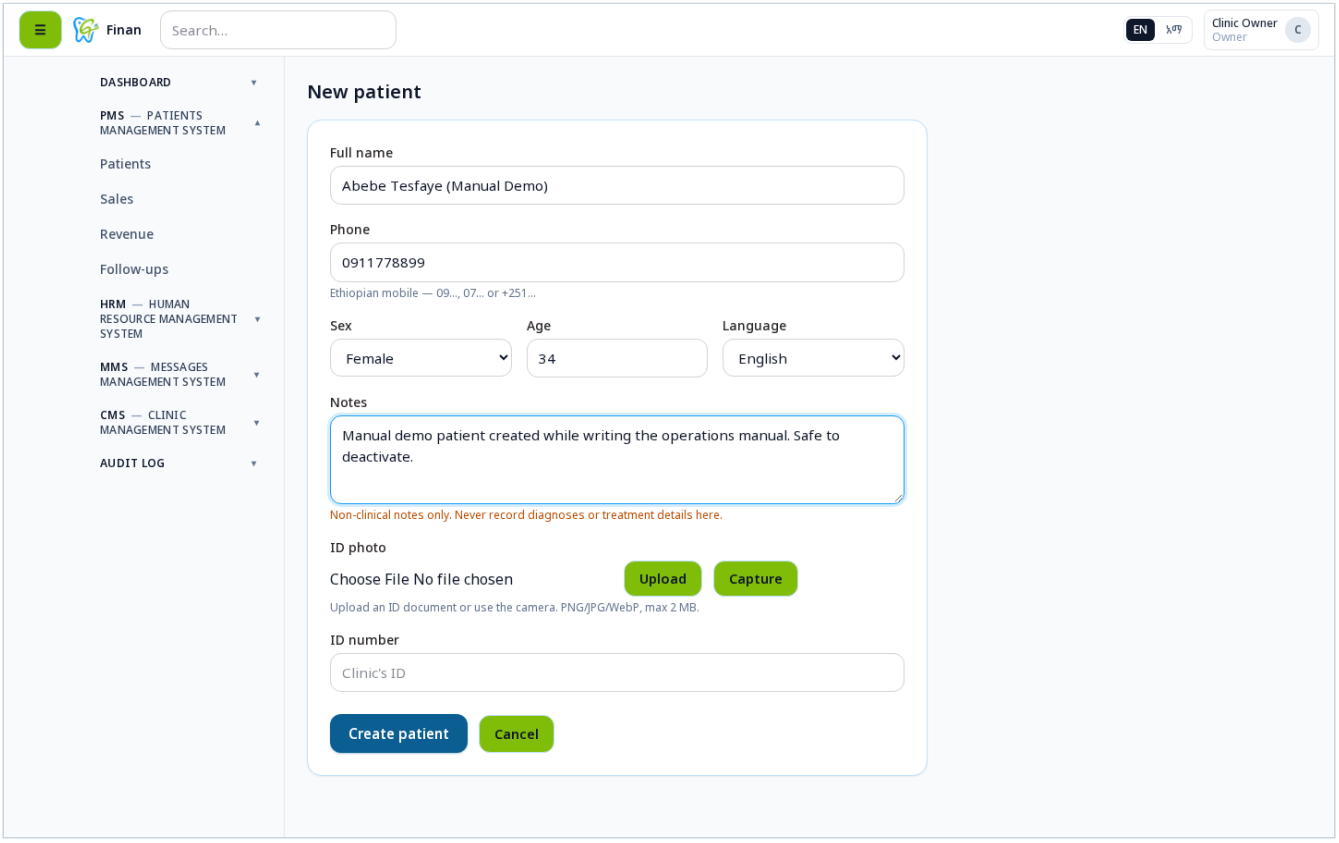

3. Adding a New Patient

3.1 Empty Patient Form

To add a new patient: 1. Click "New Patient" from the patient list 2. Fill in the required information

3.2 Filled Patient Form

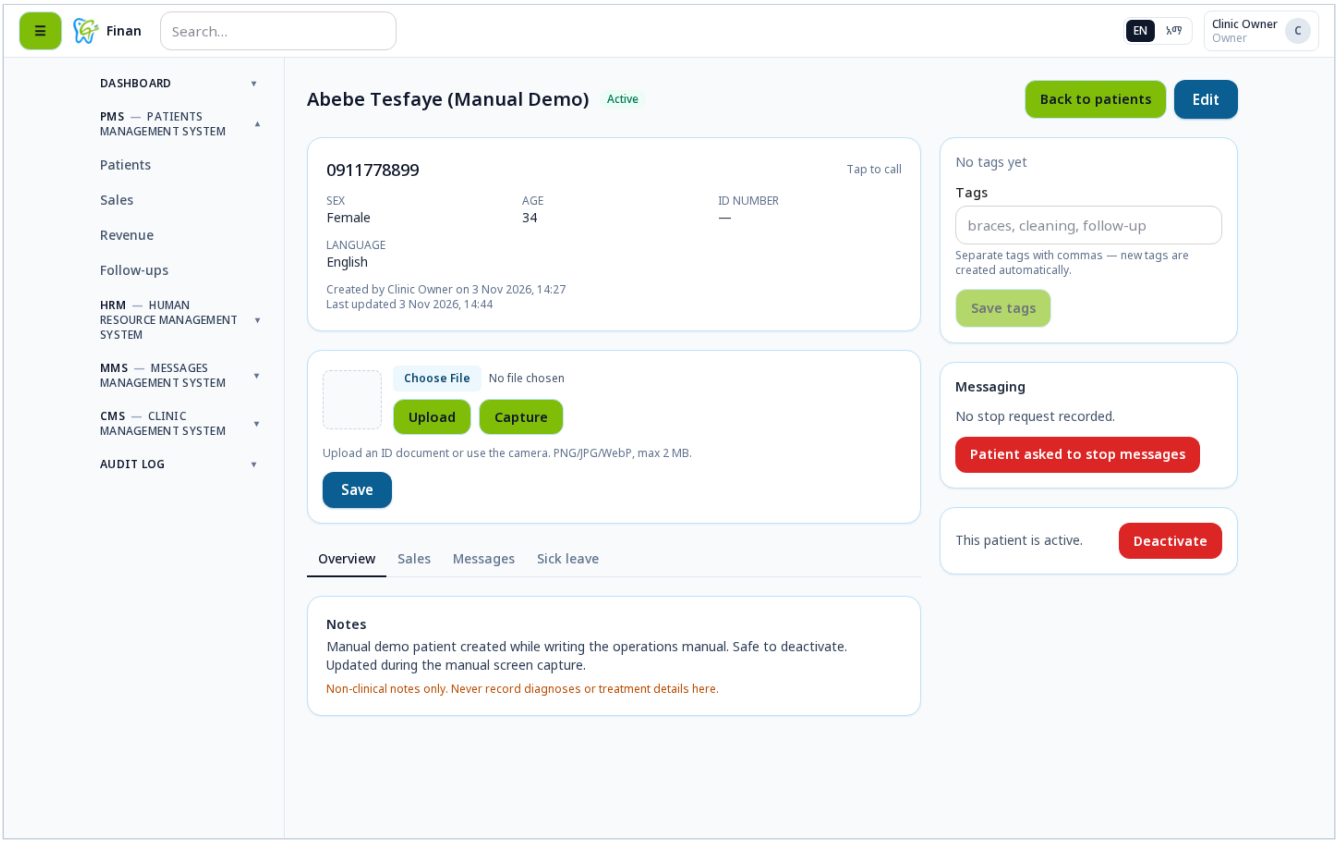

Required Fields: - **Full Name (English/Amharic)** - Patient's full name - **Age** - Patient's age (whole number) - **Sex** - Male/Female/Other - **Phone** - Contact number (Ethiopian format accepted) - **Address** - Patient's address

Click "Save" to create the patient record.

---

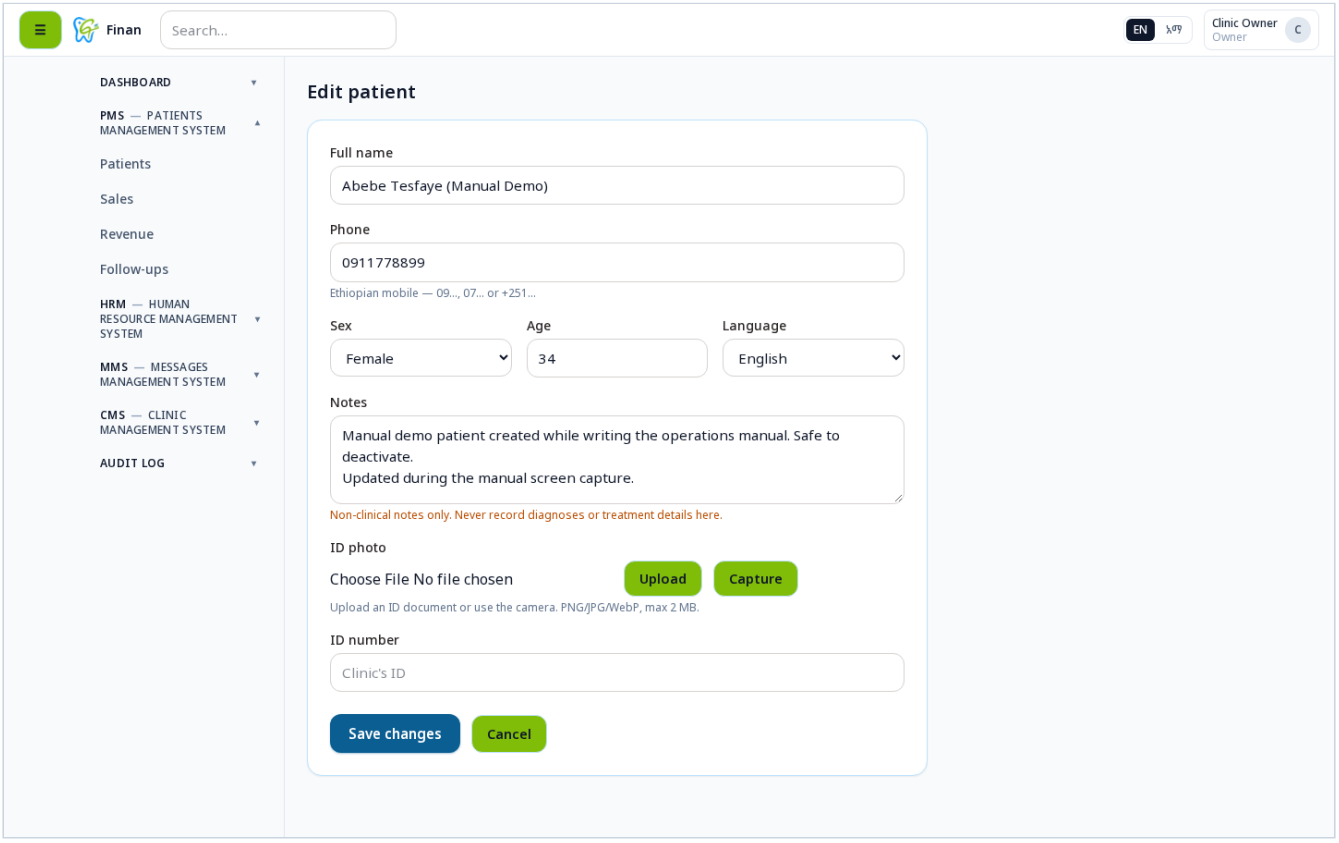

4. Viewing and Editing Patient Details

4.1 Patient Detail View

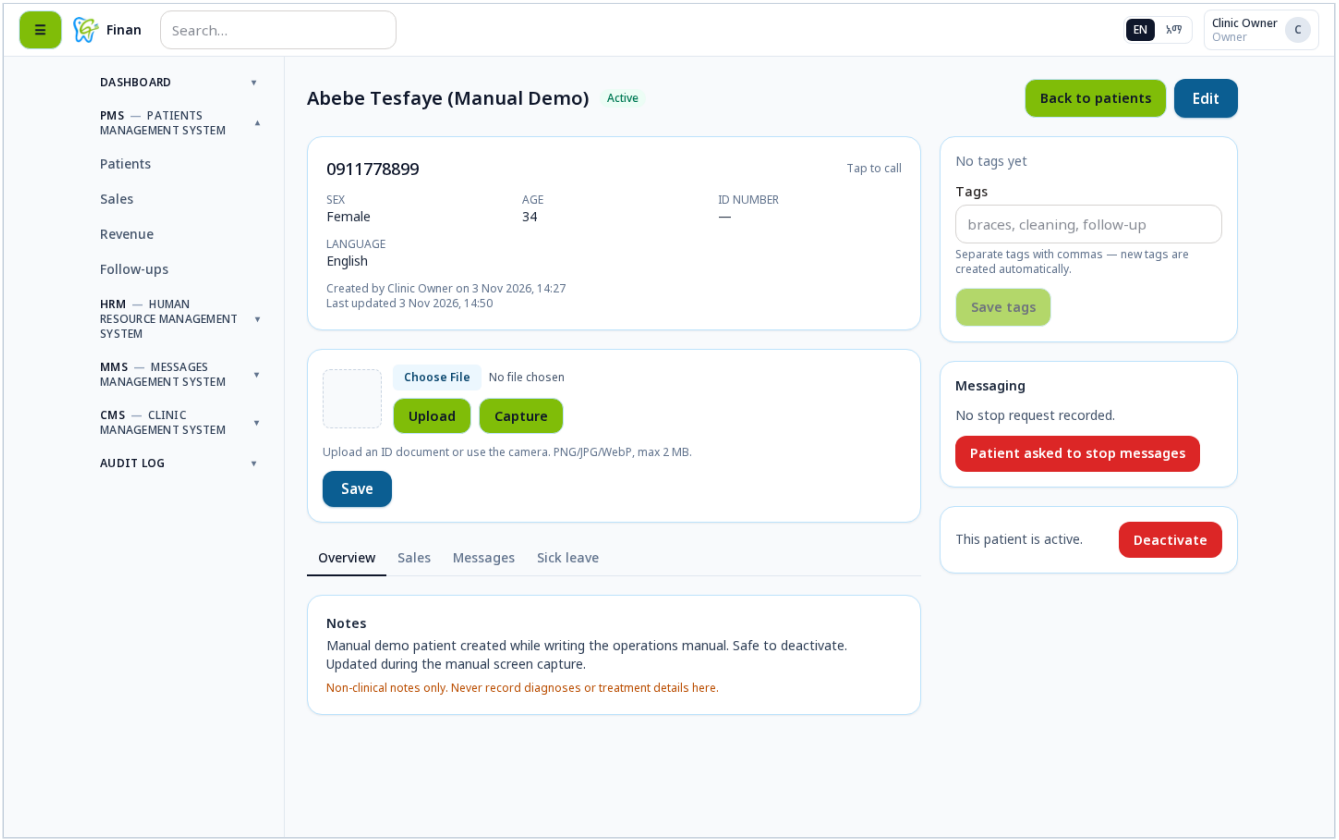

The patient detail page shows complete patient information, including medical history, appointments, and sales records.

4.2 Editing Patient Information

To edit patient information: 1. Click "Edit" from the patient detail page or patient list 2. Update the necessary fields 3. Click "Save" to apply changes

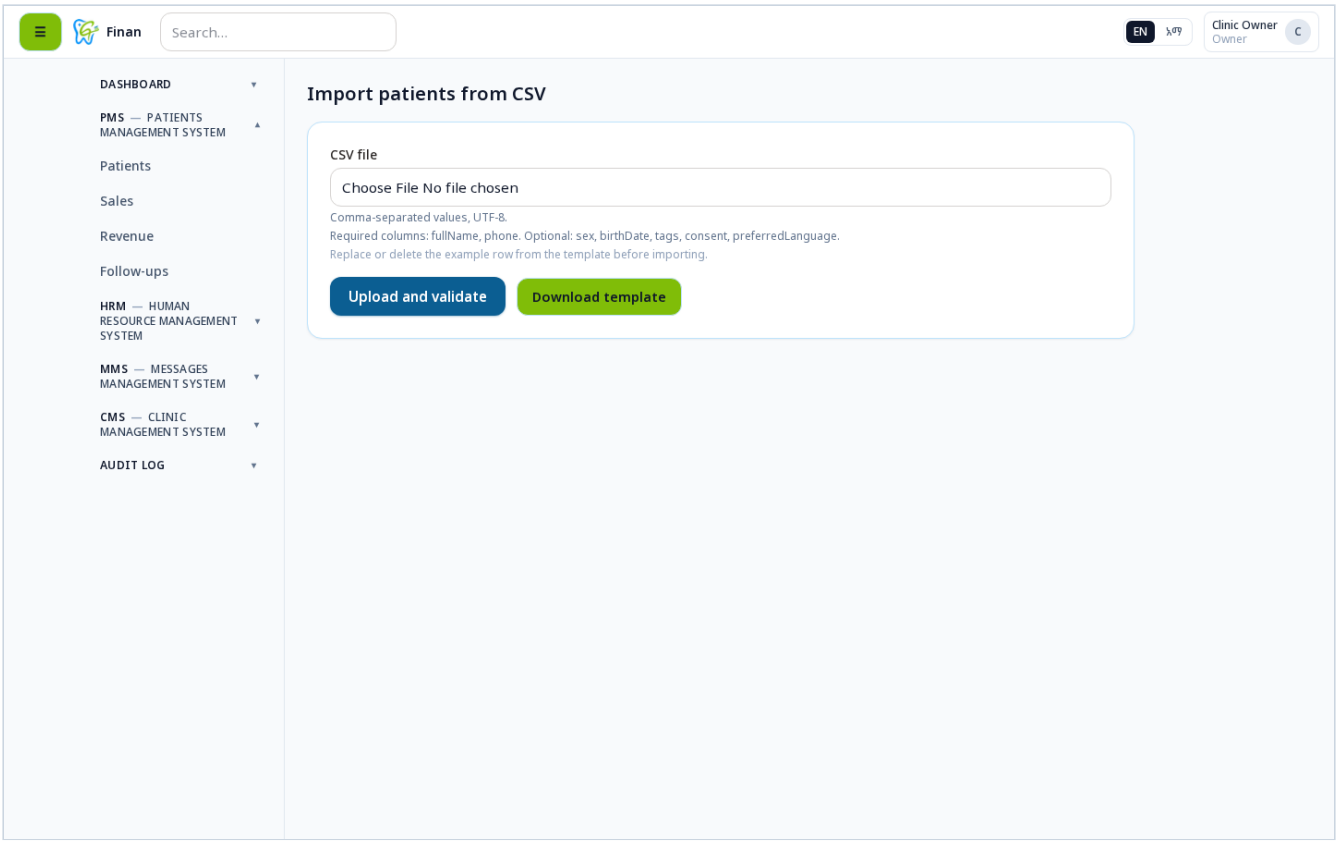

4.3 Patient Update Confirmation

A confirmation message appears after successfully updating patient information.

---

5. Patient Import

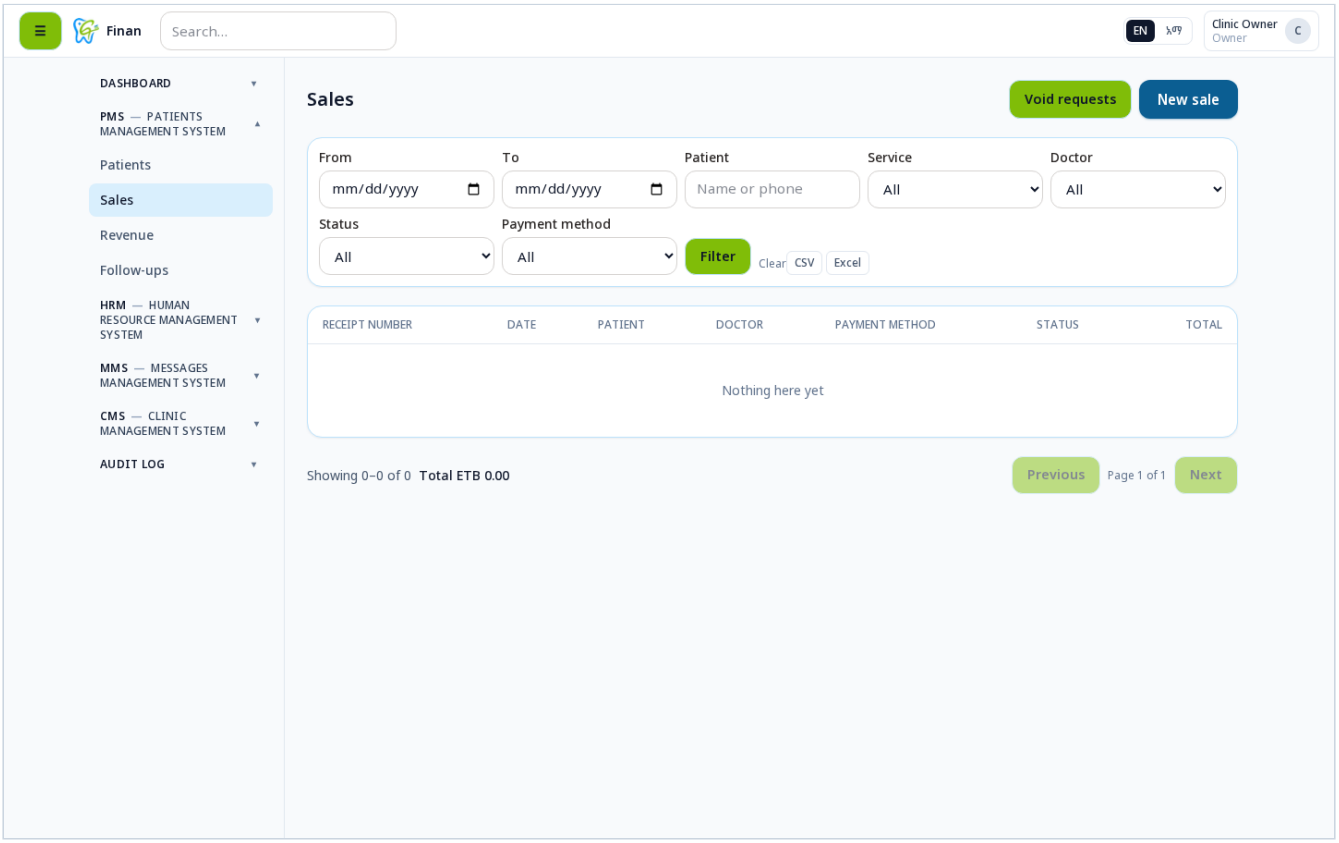

The patient import feature allows bulk import of patient records from external sources. Follow the provided template format for successful import.

---

6. Sales Management

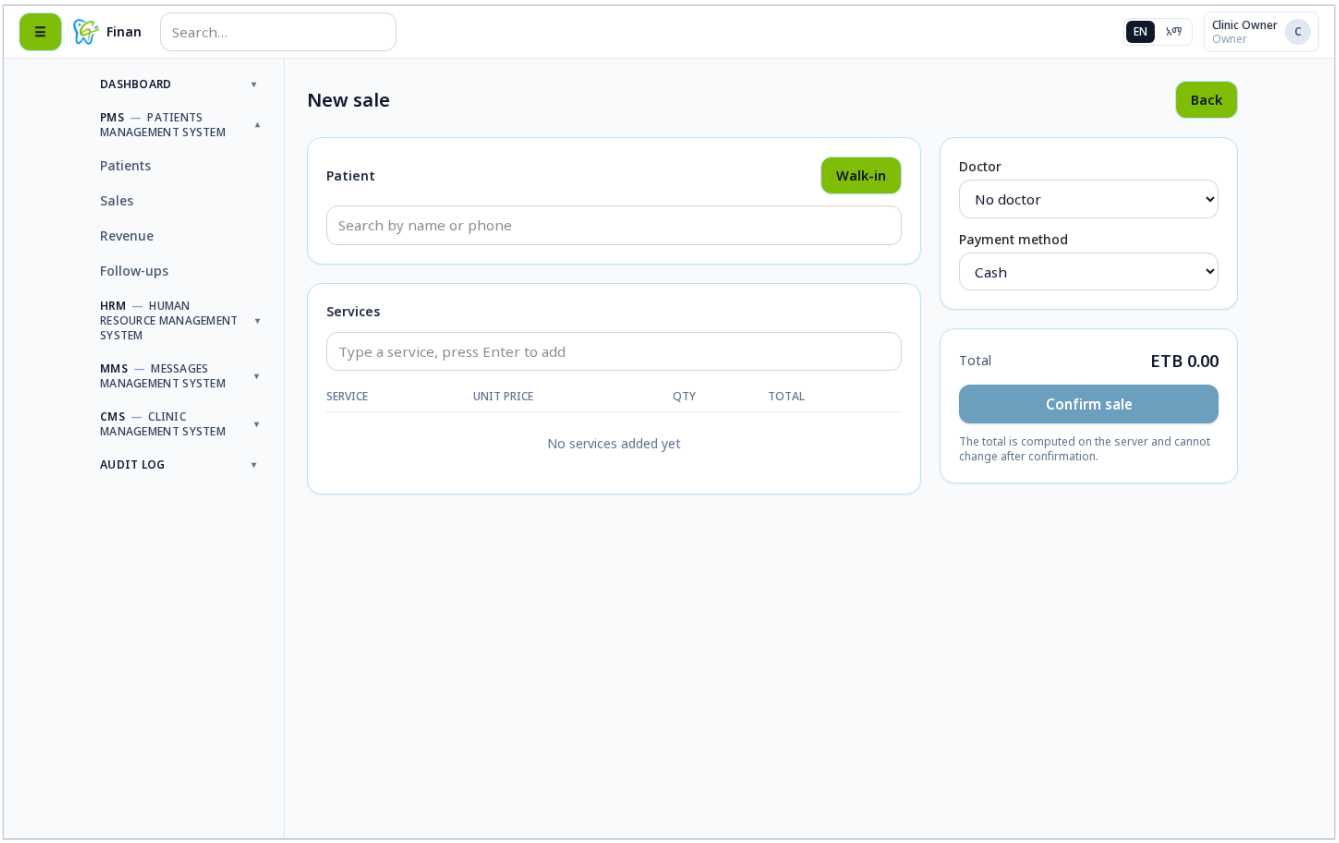

6.1 Sales List

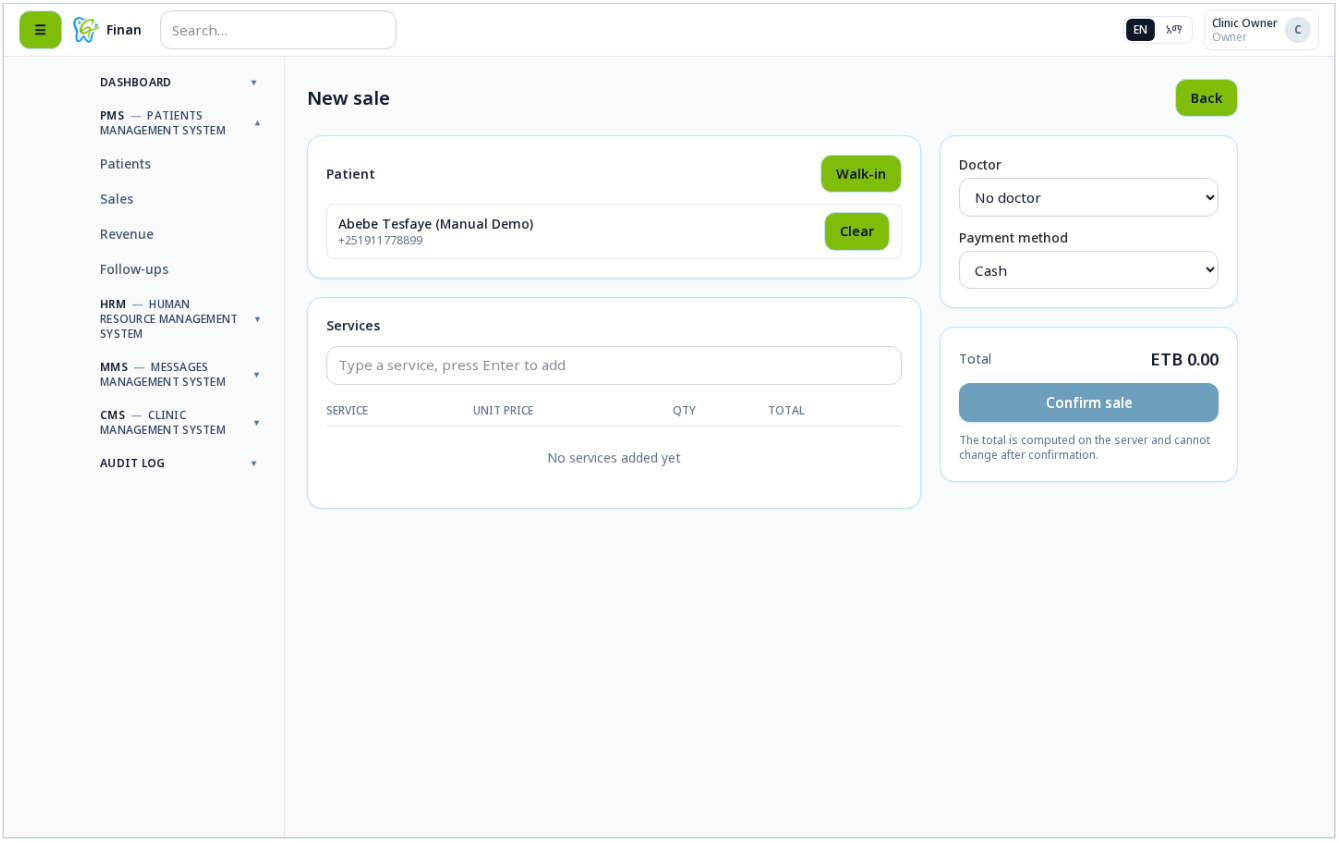

View all sales transactions in the Sales module. Track payment status, amounts, and transaction details.

6.2 Creating a New Sale

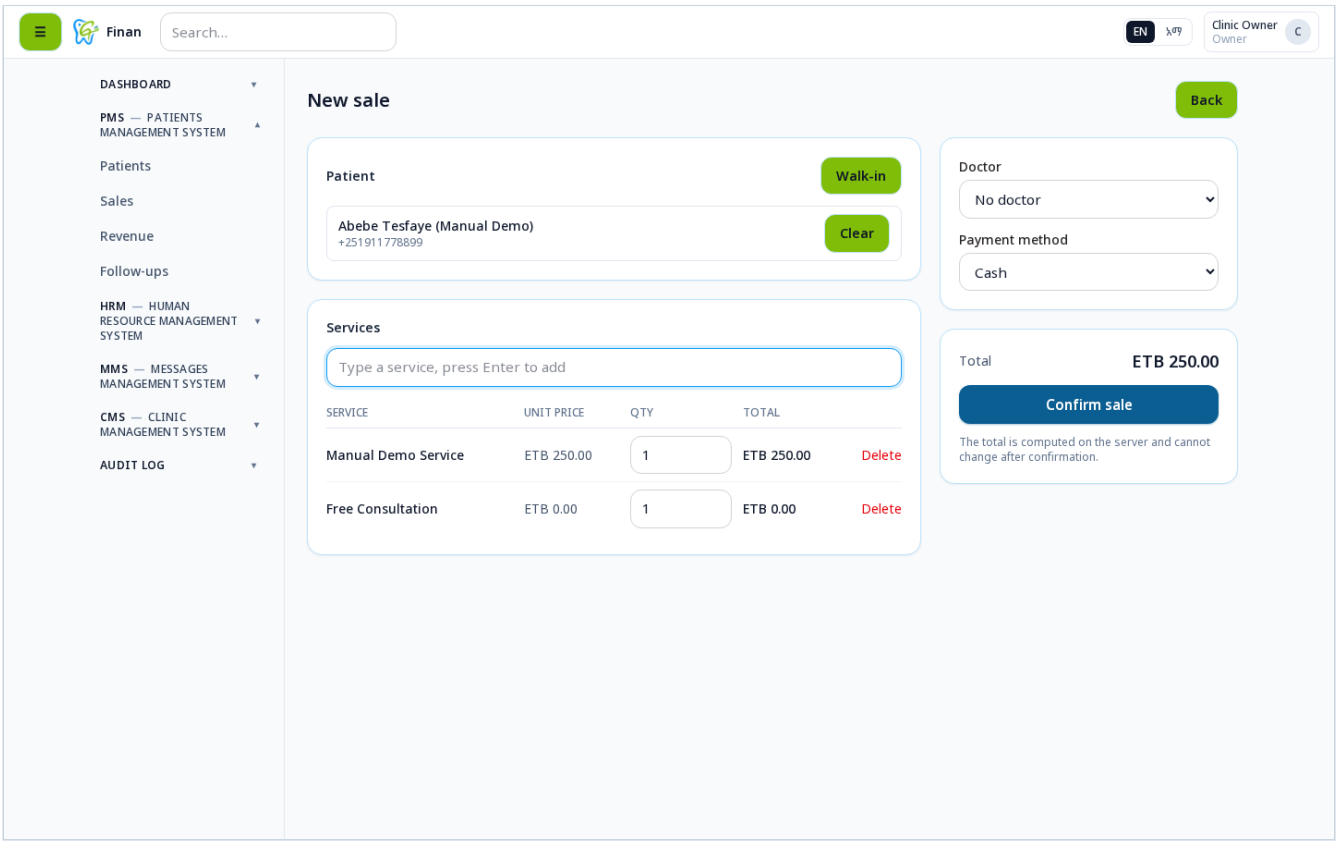

Empty Sale Form

Select Patient

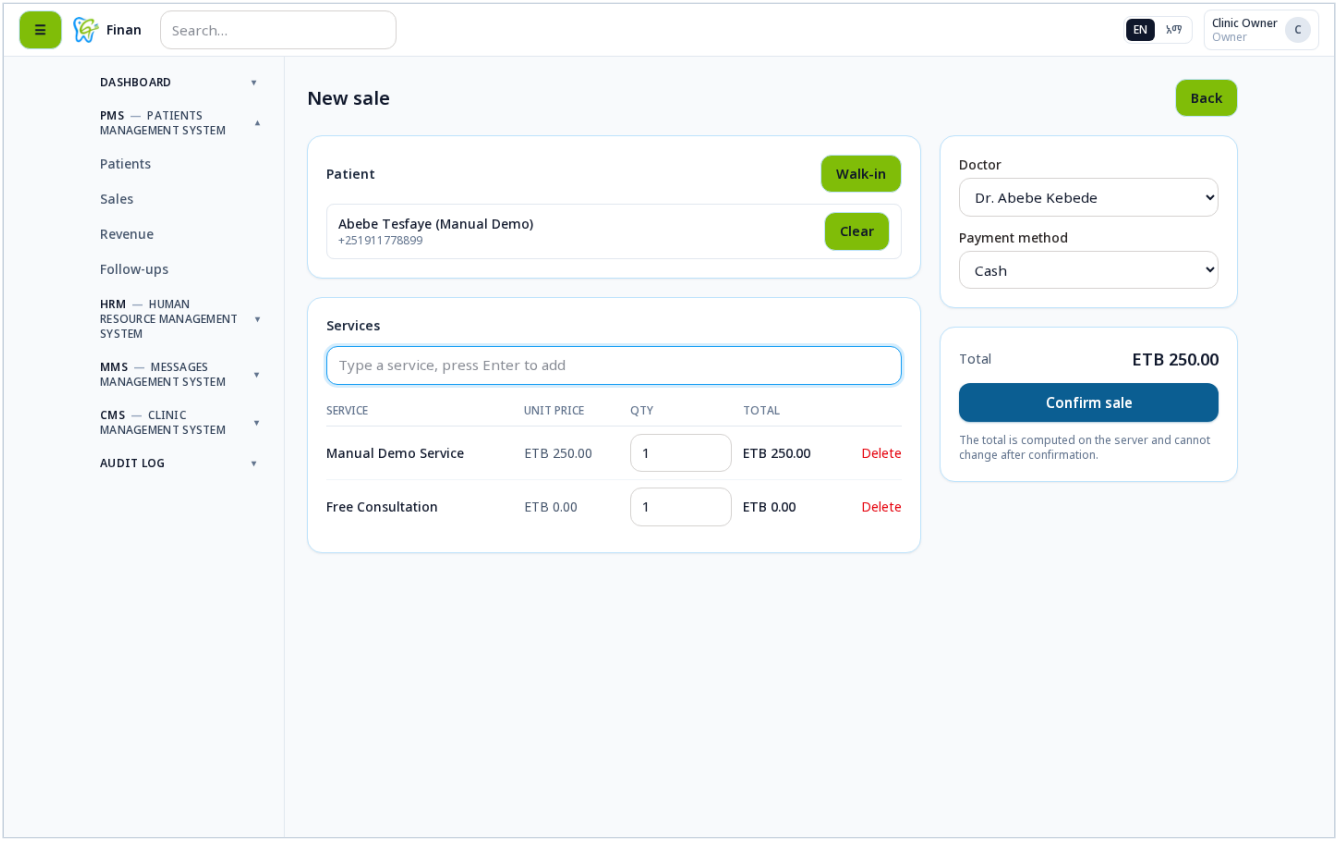

Add Services

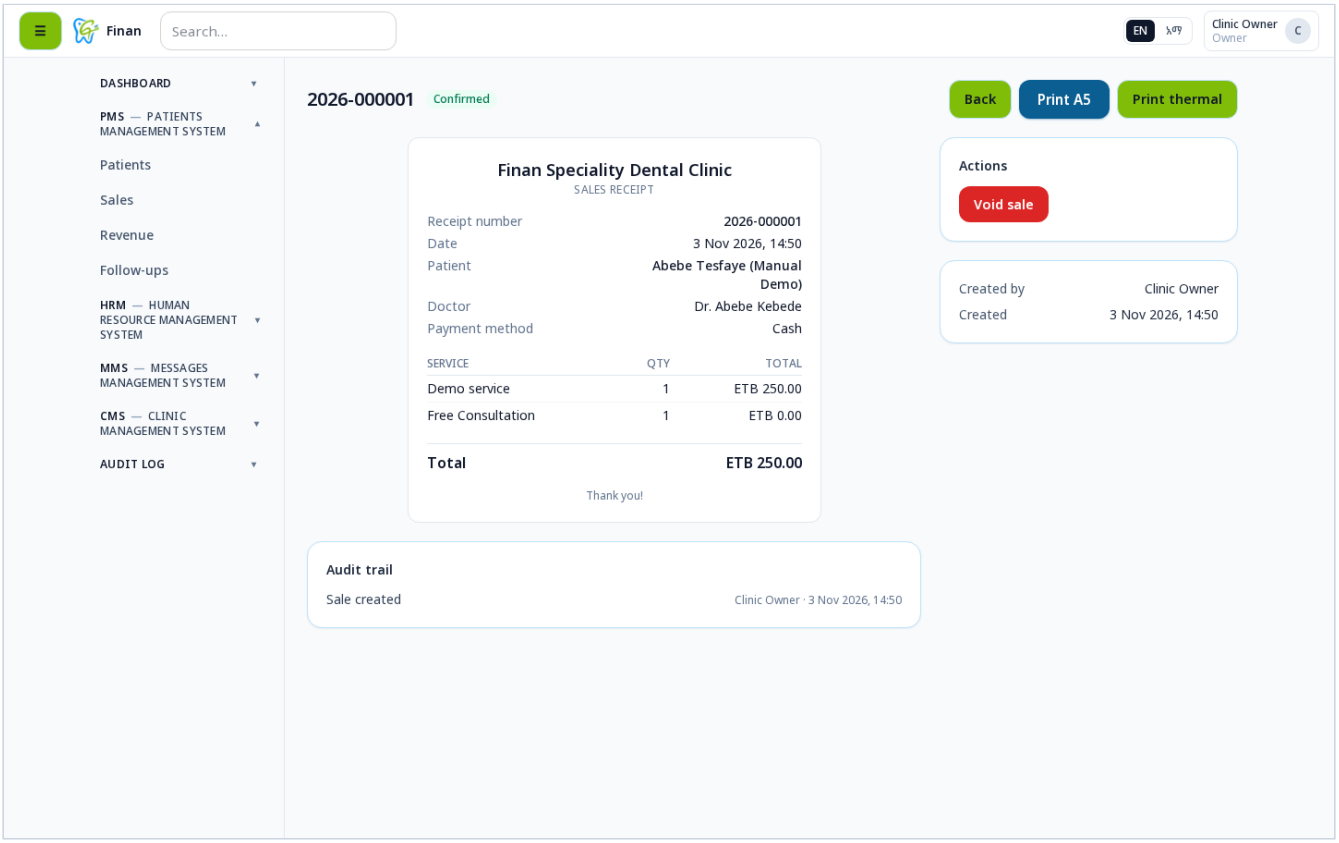

Steps to Create a Sale: 1. Navigate to Sales → New Sale 2. Select or search for the patient 3. Add services from the service catalog 4. Specify quantities if applicable 5. Proceed to payment details

Doctor and Payment

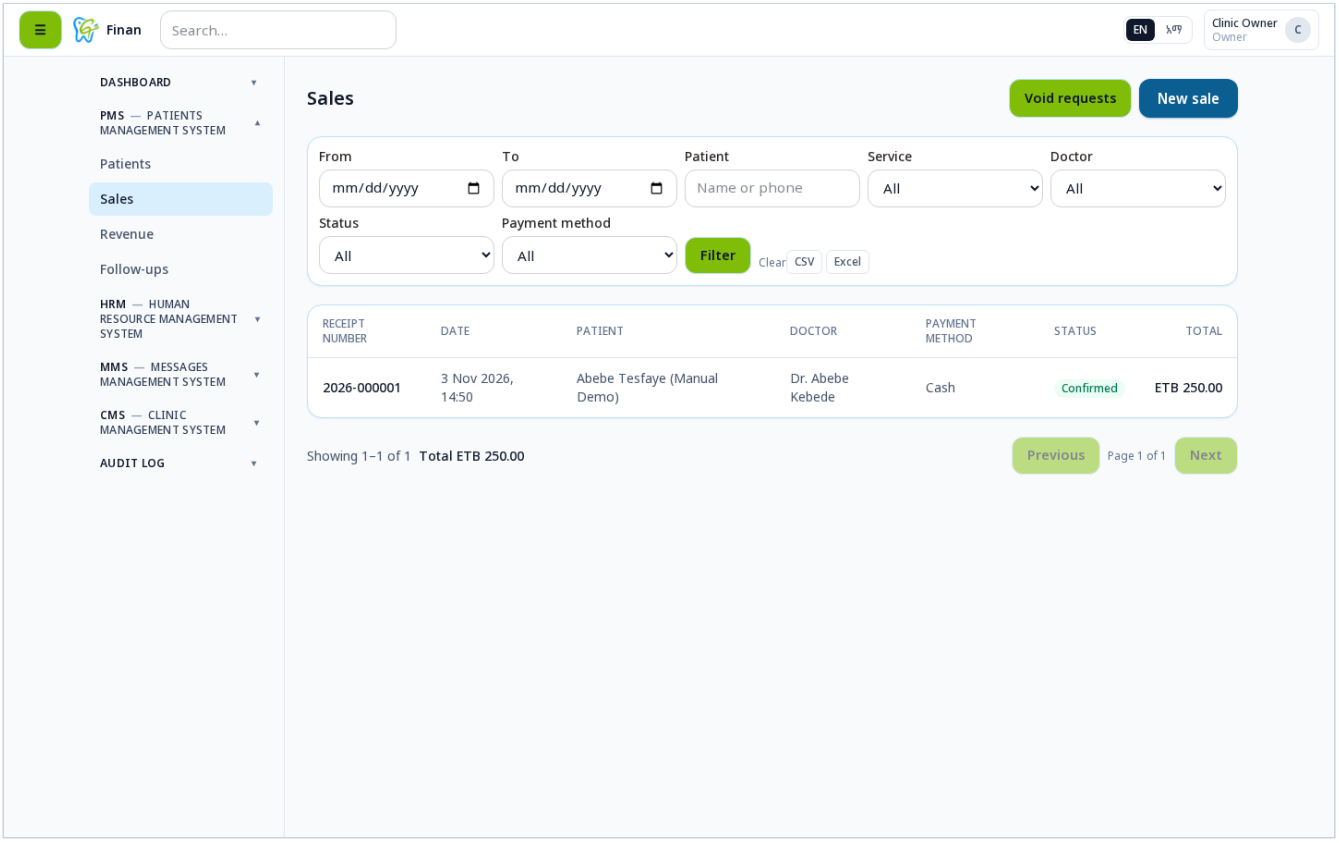

Assign a doctor (if applicable) and configure payment details: - Payment method - Amount paid - Balance (if any) - Notes

6.3 Sale Receipt

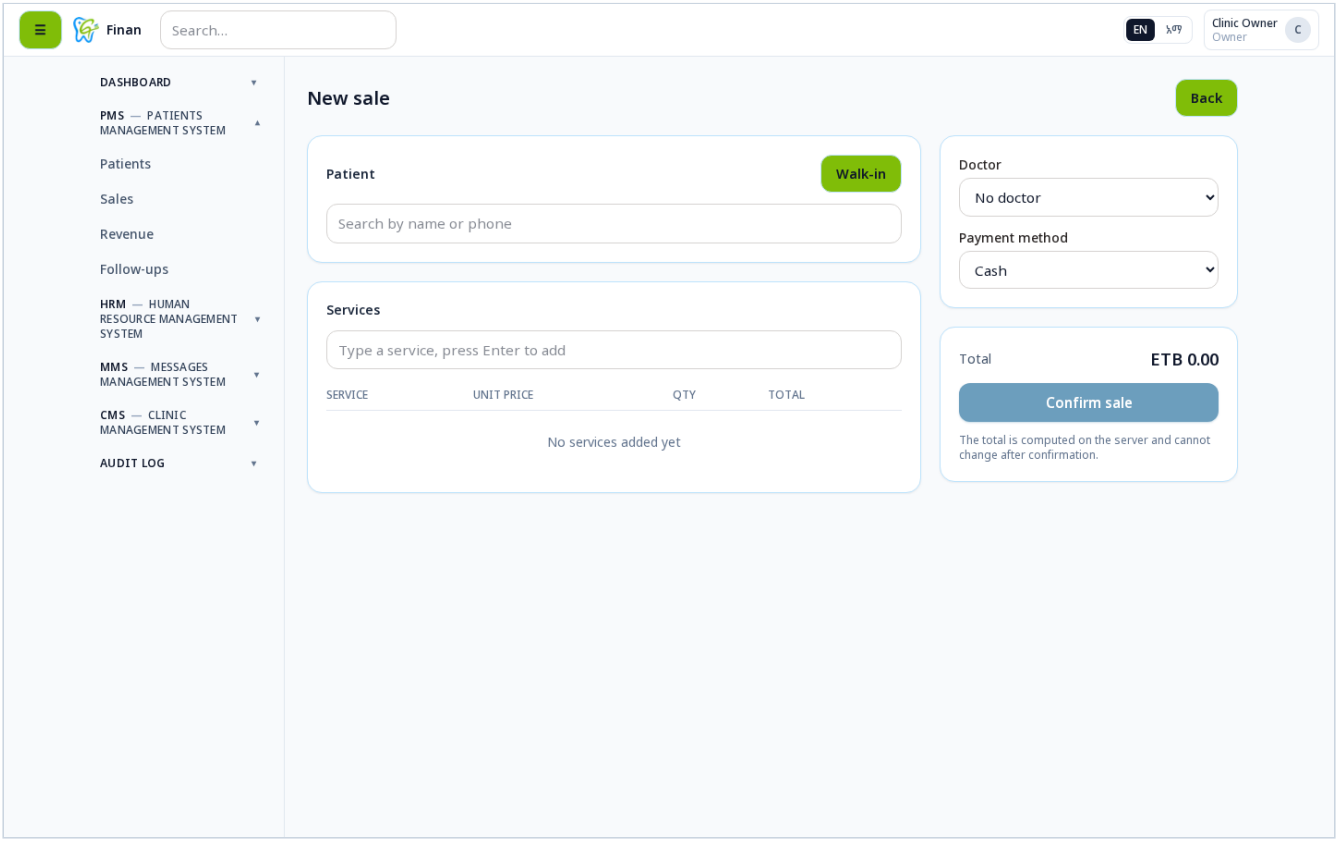

Print or view the receipt after completing a sale transaction.

6.4 Sales List with Completed Sale

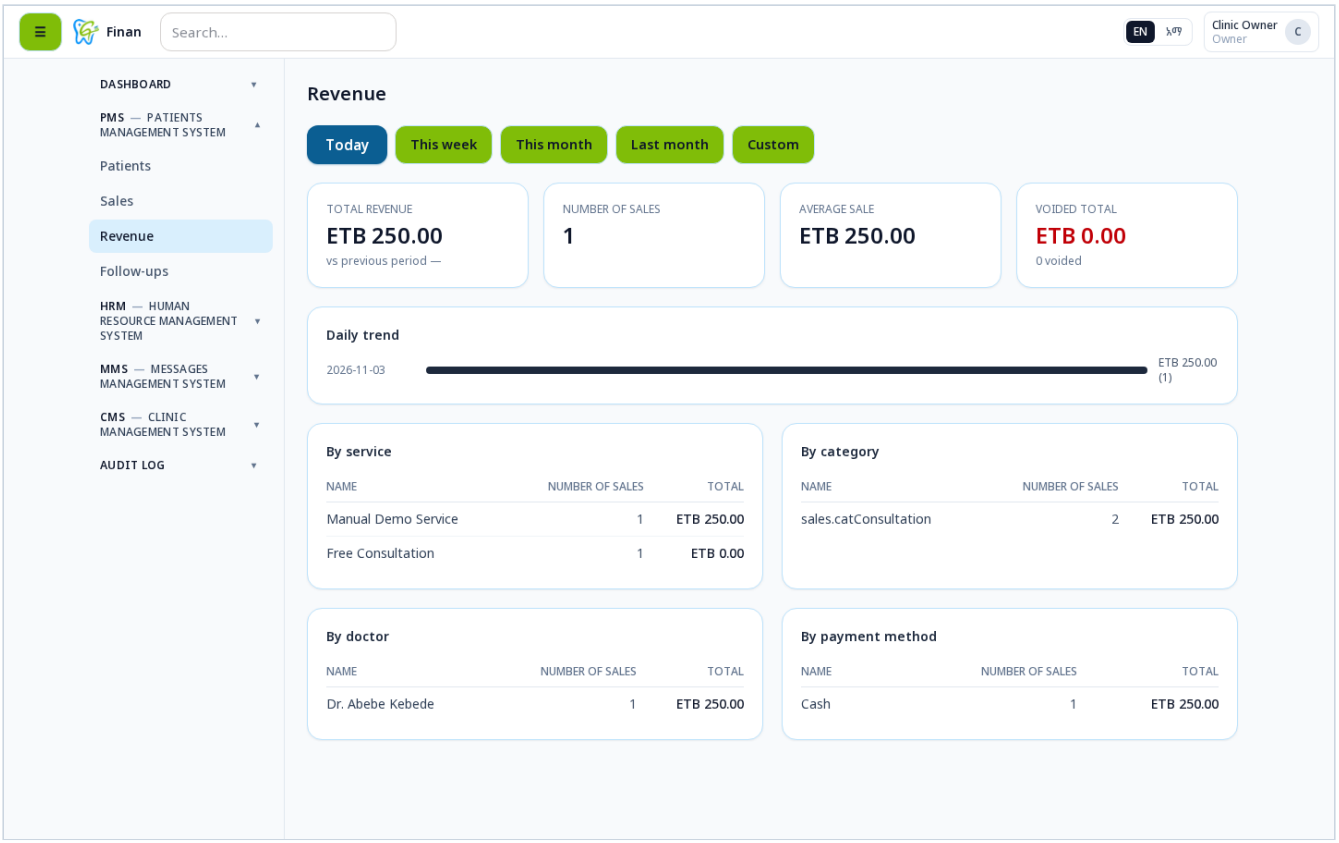

Completed sales appear in the sales list with their status and details.

6.5 Sale Detail View

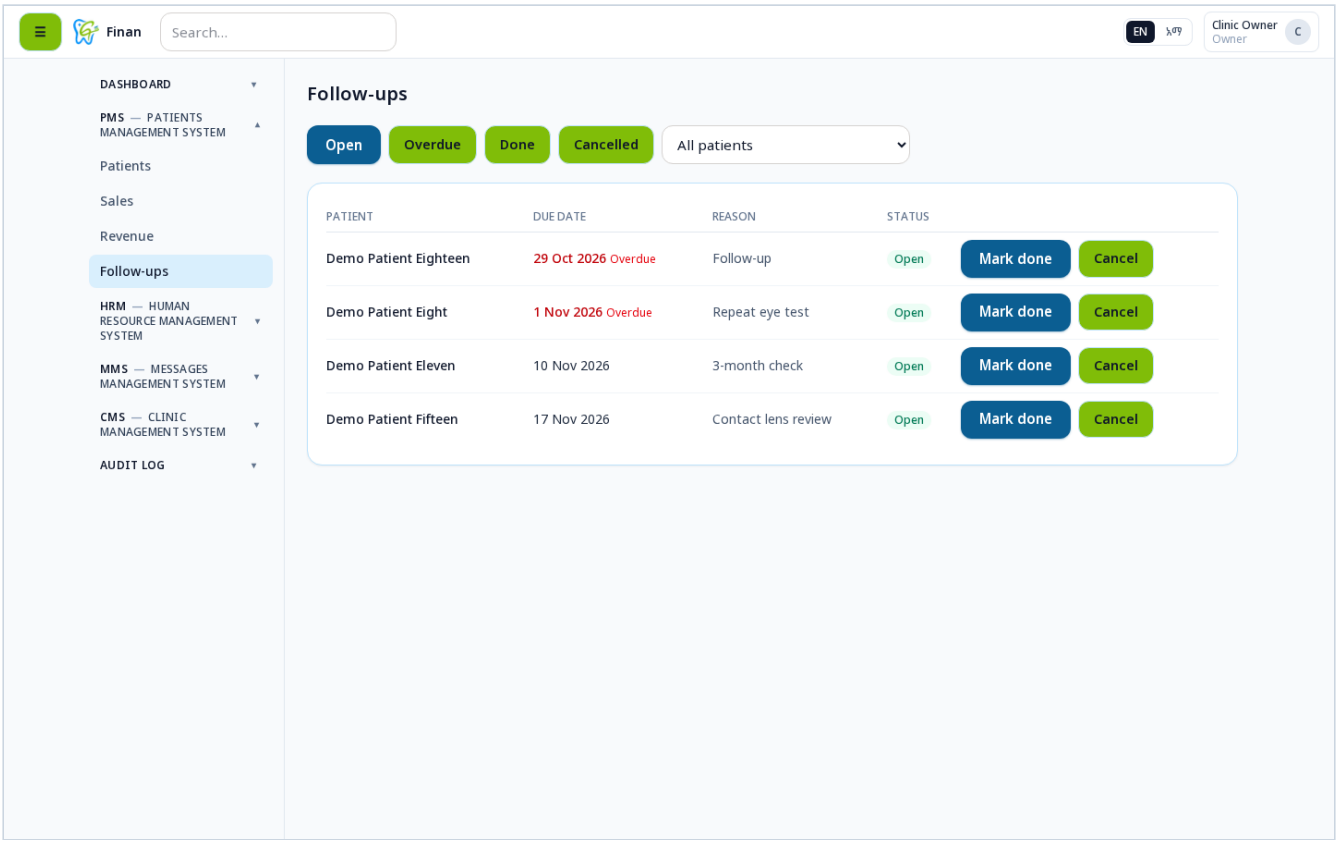

View complete details of any sale transaction, including services, payments, and receipts.

7. Revenue

The Revenue module provides financial insights: - Daily/periodic revenue tracking - Payment summaries - Revenue by service/doctor - Outstanding balances

8. Follow-ups

Track patient follow-ups and scheduled callbacks to ensure continuity of care and patient satisfaction.

For Support: Contact the system administrator for assistance with the PMS module.
